

A. Pomerantz & Co.

WE DO IT ALL.

OUR PROJECT MANAGEMENT OPTIMIZES THE EFFECTIVENESS OF YOUR SPACE

Service Disabled Veteran Owned - Certified Minority Owned Business - HUBZone Small Business

A. Pomerantz & Co. specializes in developing environments to suit the individual needs of every customer. Our team customizes products and services around each customer's desired results while maintaining the basics such as: workspace effectiveness and cost avoidance planning.

Pomerantz assembles a dedicated team specifically for each major account. Our Major Account Teams consist of experts in creating effective environments including Sr. Designers who have at minimum 10 years experience, and our Sr. Project Managers who have over 30 years of industry experience with extensive expertise in coordination and management of large projects throughout the United States.

Our diverse customer base has required our team to provide product and service solutions for a variety of situations. Our capacity to handle large customer projects is apparent through our portfolio of work, but our focus on providing each customer with individualized attention and customized solutions is what sets us apart from the competition.

A. Pomerantz & Co. is the only dealership with a model and mission based on strengthening and maintaining an exclusive customer base - designed to ensure customer satisfaction.

Our national customer base requires Pomerantz to offer flexibility in our vast product and service offering. The aesthetics and functioning of workplaces can vary differently through out the world. If your goal is to create a dynamic environment for your team we will listen to your desired outcome and we will engineer an effective solution.

A. Pomerantz & Co. is an authorized Steelcase® dealer, representative of over 400 manufacturers globally and provider of an extensive service offering. As a Service Disabled Veteran Owned Company, Minority Business Enterprise, Certified by the NMSDC, and a HUBZone Small business, we are experts in developing productive and efficient workplace environments for the Commercial Industry, Healthcare, Education, and Government Agencies.

Effectively supporting people, technology, and work processes through workplace design enables companies to control costs and enhance worker productivity – ultimately increasing business results.

- Audio & Visual Products
- Workstage Buildings

Representing over 400 manufacturers

A. Pomerantz & Co. was established in 1888 in Philadelphia, PA founded and operated by the Pomerantz family. Garry Maddox purchased the company in December of 1994. Pomerantz has offices in Chicago, IL and Philadelphia, PA and has sales/account management representatives in Florida, Northern California, Virginia, and Florida.

The longevity of the organization has supported our progression which is dependent on the knowledge and experience of our team. Pomerantz continually enhances our systems and processes by adding technology, industry altering trends, and efficiencies to what is already a fully functioning, effective machine.

Our Team

Pomerantz upholds strong work ethics and maintains a professional and respectful work environment. Our executive team is a dynamic group who understand the significance of integrity in work and in the community and providing our customers with fresh, innovative solutions.

Garry Maddox Chief Executive Officer

As owner, and CEO of A. Pomerantz & Co., Garry provides the City of Chicago & Greater Philadelphia with a dedication to offer the highest quality products in both office furniture and related workplace solutions. Garry leads his sales team in building strong customer relationships and bringing a customized approach to completing individual projects. Extensive planning and process driven systems are essential to Pomerantz's strategy in obtaining consistent customer satisfaction and elimination of errors.

Garry serves on the boards of the Federal Reserve Bank of Philadelphia, the Greater Philadelphia Chamber of Commerce, and Corporate Alliance for Drug Education. He is also the Director Emeritus at the Philadelphia Child Guidance Center, and on the Board of Governors for the National Adoption Center.

During Garry's distinguished 14-year career in major league baseball, he won his first Gold Glove in 1975 which was his first of eight in a row when he was Centerfielder for the 1980 World Champion Phillies team. In 1986 he was honored with the Roberto Clemente Award, given annually to a player who demonstrates the values the Pittsburgh Pirates Hall-of-Famer displayed in his commitment to community and understanding the value of helping others.

Garry is committed to giving back to the community in which he lives and operates his businesses. In 1997, he founded The Urban Youth Golf Program of Greater Atlantic City, a nonprofit organization that through a volunteer network is tutoring elementary school at risk children while offering the challenge of learning the game of golf. This effort continues to grow in importance to Garry as a mission, as well as the communities his program now serves. Today this program encompasses 150 students in grades 1-4 within the City of Camden, New Jersey and Philadelphia, Pennsylvania. Garry is currently developing plans to organize a similar Program within the Chicago, IL area.

Linda Rudi
Chief Operating Officer

Linda currently provides the Chicago and Philadelphia Market place with a commitment to the betterment of the community and Pomerantz as an organization. She focuses on employing individuals from underutilized business areas in an effort to stimulate progress and growth in these communities. She also upholds strict quality standards and enforces the value of working with reputable, local talent in order to achieve desirable results for each customer.

Linda spent 10 years with Ernst & Young as a certified public accountant before joining A. Pomerantz & Co. in 2001. During her years with Ernst & Young she serviced a variety of businesses ranging from high-growth companies in the entrepreneurial marketplace to privately and publicly held retail, manufacturing, distribution, and service companies.

Linda has created efficiencies and accuracy improvements by integrating improved technology throughout Pomerantz, restructuring the operation of the company by automating ordering, auditing, and accounting processes.

Linda's market-segmentation and sales structure created stronger sales and higher customer satisfaction with a leaner yet highly productive organization.

In 2001 shortly after joining the organization as CFO, Linda developed plans which turned the company into a nationwide supplier. The organization currently holds national account contracts with multiple Fortune 500 companies.

Knowing our Customer

Our best research, development, and processes are all obtained through listening to our customer's needs, wants, initiatives, obstacles, history, and future plans. Our process map covers the basic steps, but our customers need individualized attention. Our account managers and project managers spend time developing each schedule and approach for every customer project. The experience of our team enables them to envision possible obstacles, and eliminate risk of error in the pre-planning phase. Once the plans are in place and all communication is clear and concise the work runs smoothly, reducing costs associated with resolution and reactionary activity.

Business Model

In fact we've structured our sales, customer service, and marketing approach around listening to our customers. Our company now focuses on a select number of customers in order to provide exemplary service and individualized attention. Each customer has a designated team assigned to develop and maintain each account's projects and activity. We offer a 24 hour response time for any customer inquiries, requests, and/or concerns. Each primary account has one contact providing our customers with time savings and convenience.

Employee Happiness :)

Ergonomics are essential to our overall well-being. Slouching or improper positioning in your chair can greatly affect your physical health. The configuration of systems, use of natural lighting, and furniture selection not only affect the physical and mental health of the people within the workplace, but also add to the aesthetics and sustainability of the office. Our design team enhances the priorities of the office and finds the most suitable selection of furniture with consideration of the office functions and employee happiness.

Pomerantz now employs research and observation studies to develop environments based on company initiatives, branding, goals for productivity, employee health, comfort and work habits, and the visitor experience. Workplace environments should be customized according to the individual company needs.

Innovation

Pomerantz does represent over 400 manufacturers' products around the world. With the benefits of choice we also offer the research and innovation of all the great minds at each of these companies. We continually reinvent our own processes to adapt to the new trends and technology. We also encourage and promote new innovations designed to benefit our customers whether it be office furniture or new ways of working. Ask about our latest research projects and "behind the curtain" tours.

It's not Value Engineering at Pomerantz

It's about prioritizing. Our designers do not compromise the necessary design features or functional elements which are important to our customers nor do we diminish the integrity of an Architecture & Design Firm's layout and designs. We do provide alternatives to adding what are commonly referred to as "specials". Slight differences in product details from manufacturer to manufacturer can drive up the sell price for multiple dealers or manufacturers resulting in a lopsided bidding procedure.

Pomerantz makes the difference known and will negotiate with manufacturers to find a cost effective way to manufacture the special product, or offer the closest match. If a customer is partial to a product line or manufacturer we can also specify the design to include lower cost items in conjunction with the preferred design elements.

Easy Being Green

Pomerantz offers the largest amount of sustainable products available. Some fabrics and products offered today are not only constructed of recycled materials, but can now be broken into parts and recycled after use. Long term use of furniture cuts down on waste caused by frequent disposal.

With offices in Chicago, IL and Philadelphia, PA, Pomerantz is one of Steelcase's largest dealerships with LEED AP Certified Sales Representatives and IIDA Certified Designers. As a part of our solution-driven initiatives Pomerantz provides creative disposal services like IRN which makes recycling simpler by sending discarded furniture and equipment to third-world countries to be reused.

All services are managed by an experienced Project Manager who can be contacted for any service requests, questions or inquiries. This complete bundle of services creates a quick and efficient process with one convenient contact. Our comprehensive services reduces cost through a streamlined processes and project management

Inventory

Always make sure your assets are covered. Bar-coding Asset Tracking is available for inventories which report Cost Analysis, Depreciation, Furniture and Equipment Reuse. Reports are viewed via an exclusive secure website which also offers pictorial catalog. Online service orders can generate move, repair, and/or disposal requests.

The system can automatically analyze the amount of product in the inventory against an AutoCAD drawing and determines what products are available in the existing inventory and what new parts are needed in order to complete a design. Re-use cuts down on unnecessary purchases and disposal.

Rental

Rental is a great service for temporary spaces and spaces which need to be furnished in a hurry. Our rental offering includes high quality furniture with all of the ergonomic features needed for a comfortable work environment. Our Rental furniture can be delivered within a time frame as slim as 48 hours.

Refurbishment and Reconfiguration

Sometimes it's not always best to buy new. Depending on the condition of the used furniture, Pomerantz's Service Team will analyze the cost for refurbishment and/or reconfiguration against a new purchase and determine the cost difference to help customers decide on the best approach to revitalizing and furnishing the office.

Furniture Recycling or Disposal

Pomerantz first determines the recyclable content of the furniture and breaks all items down for separation. Most metal portions of the furniture are easily recycled. Items such as the Think chair are Cradle to Cradle product which means the item is 100% recyclable. Pomerantz assures nothing recyclable is mistakenly disposed of in a landfill. Brokering is also a viable service Pomerantz offers to promote furniture reuse and avoid landfill disposal. Brokering is a great way to help the environment and supplement your new furniture investment.

Reports can be generated to measure the amount of products, equipment, or flooring which was recycled, reused, or disposed.

Moving

Take the time to do it right the first time. The most important focus when planning and implementing a move is to minimize disruption. A move should never impair the productivity of an office. Pomerantz move experts prepare accurate preliminary budgets and oversee the installation to eliminate damages and disruption. Our move project manager acts as a liaison for our customer by frequently communicating with vendors and manufacturers. Our pre-planning and methods minimize disruption, damages, and downtime and bring the best value to our customer's move projects.

Carpeting & Flooring

Before any furniture is installed the flooring must be installed. Pomerantz represents top line carpet and flooring manufacturers and we insure that all work maintains a timeline which coincides with the furniture installation.

We have a LEED, AP carpet expert who can handle your flooring needs from order selection and placement, maintenance and cleaning, and finally recycling and removal. Our flooring includes: hard flooring, raised flooring and carpeting.

Technology: Software & Electronic Capabilities

You can access all information from anywhere at any time. Before you hit the beach, peruse your order status, place an order, check out a drawing, or run a report so you can enjoy the rest of your day with peace and relaxation. Pomerantz has teamed with an IT/Software firm to provide our customers with customized software capabilities.

EDI Billing Invoicing: Electronic transactions speed the ordering process.

Customized Reporting: All reports can be customized to contain all pertinent information in a convenient format. These reports can be delivered via email, posted online, and/or delivered hard copy through any desired delivery service.

Automation of Current Tools and Processes: Customized software programs can be created to interact with our customer's current platform and applications.

Technology Updates: All online tools are hosted on the Pomerantz network enabling software updates and monitoring to occur without interruption or any assistance from our customers.

Design and Rendering: Realistic 3D renderings can be fashioned for any furniture conception or selection. 3D Studio Max including the latest plug-ins is used to create photo-realistic depictions and can be created for an entire office fit-out or limited to an office or workstation. Carpet, windows, curtains, desk accessories are some of the elements which can be added to all rendering depending on the need for detail. This is a fast alternative to preliminary mock-up installations. The renderings are also a great tool for local offices to understand how the company's branding and best practices relate to the office environment.
