What do we do?

In a time of rapidly changing corporate requirements and constant bottom-line pressures, maximizing the value of your workspace investment has never been more critical. That's why more and more Storr clients are putting our expertise and experience to work to manage a broad range of assets and ensure prompt and efficient response to relocations, corporate restructuring, new construction delays, and more.

For corporate standards development, long and short-term storage of surplus product or inventory assessment, Storr's team of professionals offers the knowledge and experience to provide an asset management program that meets your specific goals. And with over 100,000 sq. ft. of warehouse space available, we can effectively handle any size storage need.

How we do it.

The Storr Asset Management system represents a proven method to efficiently inventory and track furniture, computers, equipment and a wide range of other items. The result: real-time, 24-7 access to details of all assets in inventory for accounting, facility management planning, reconfiguration and long term storage. Using state-of-the-art asset management software, Storr can provide you with accurate and up-to-date reports, from basic inventory lists to complex depreciation schedules. In addition, you can access your inventory via the web and inquire about your product online. And it all comes backed by Storr's 95% inventory accuracy guarantee.

Why do you need it?

Storr's Asset Management program puts your workspace investment in the hands of experts. It avoids the need to use valuable internal resources while maximizing the productive life of your office furnishings and gives you a partner who's as serious about keeping your facilities running smoothly and efficiently as you are.
