What do we do?

As furniture ages due to everyday use, it takes a toll on your facility's overall appearance and can directly impact your organization's image, employee morale and productivity. By cleaning, reupholstering and painting, Storr's Services Division can improve the appearance of your facility and add years of life to your assets. In conjunction with our Used Office Furniture Department, we can also offer significant cost saving solutions to meet budgetary constraints and preserve capital you can use in other areas of your organization to gain competitive advantage.

How we do it.

At Storr, we are committed to maintaining 100 stations of refurbished Avenir Systems Furniture on hand at all times to provide a quick solution to those "need it yesterday" projects and offer a highly cost-effective solution to your regular furniture needs. Flexibility is the key. We have selected neutral finishes that will work in most offices and offer stations in standard configurations from 6x6 to 8x8 in various panel heights to solve your immediate needs. Let us create a design that works for you while providing discounts from new furniture of up to 75% off the manufacturer's list prices.

In addition to refurbished Steelcase Avenir product, we also offer refurbishing services on other Steelcase product lines as well as systems from Knoll, Herman Miller, Haworth and Allsteel. Our capabilities include:

Re-upholstery

Panels
Seating
Tack boards

Painting

Wet paint most metal surfaces.
Full spray booth and drying facility
Color match almost any existing finish

Cleaning

Panel cleaning
Chair cleaning
Fabric coating services

Why do you need it?

Refurbishing is a cost-effective means of recycling existing office furniture, reducing energy usage and providing many environmental benefits. By cleaning and properly maintaining your office furniture you can extend the useful life of your investment and enhance its residual value over time. Consider the following:

- ▶ Refurbishing, in conjunction with our carpet cleaning service, can give your entire space a brand new and refreshed look.
- ▶ The energy savings from remanufacturing just one office workstation could power 19 average American households for one day (Source: National Center for Remanufacturing and Resource Recovery at RIT).
- ▶ A refurbished panel results in the reuse of over 98% of each panel by weight (Source: National Center for Remanufacturing and Resource Recovery at RIT).
