NOVAREAD

AUTOMATIC METER REPORTING SOLUTION

NovaCopy is pleased to announce a software solution that can eliminate meter read reporting requirements and enable us to provide you errorless invoicing for serviced equipment. *FREE!*

PrintFleet is a remote meter gathering and printer status monitoring software which is installed on just one PC in your network and is provided **free of charge** by NovaCopy as part of your service agreement.

Loading the PrintFleet Agent is a fast, secure and simple process that takes just a few minutes. After PrintFleet is loaded, we use our innovative NovaRead service to gather your meters and post them to your service contract account with NovaCopy.

This means you receive:

- Complete freedom from having to report meters again
- Elimination of phone calls, faxes and emails requesting meters
- Accurate billing with the risk of data entry errors *eliminated*

You can use PrintFleet to:

- Obtain helpful information on all printers which can aid YOU in monitoring cost and usage

PrintFleet software is safe and secure:
- Only printer and copier information is transmitted.
- No access to your computer system or network is created.
- PrintFleet collects information from your print devices using industry standard Simplified Network Management Protocol (SNMP).
- PrintFleet does not collect any information on what is being printed by the printer itself or reveal any other network information.
- Printer information is sent out of your network using strictly outbound HTTPS communication. HTTPS is the robust Internet protocol used for a variety of secure applications such as on-line banking.

Call NovaCopy today to start taking advantage of NovaRead.
