Dear Joelle Yared:

I wish to simply begin by saying Thank You!

Thank you for all your assistance in acquiring an Avaya phone system for our school. From our initial planning session through implementation your patience and expertise is greatly appreciated. This investment has not only stream-lined our office but made communication between offices, classrooms, and parents effortless.

I also wish to thank the installation engineer Brad Delmar. His experience and willingness to listen to the needs of our school and tailor a unique solution made this daunting task and transition problem free.

I will not hesitate to share this wonderful experience with others who are looking for a solid solution for their school or office.

Joelle, I look forward to working with you and Brad as we begin the second phase of our system improvement.

Sincerely,

Brother Christopher Meyer, OFM
Technology Coordinator
