Atlas presents executive-level modular casegoods with 1-1/2" thick worksurfaces and contemporary Reed-style edge design. All feature **AdvantEdge**, an extra-durable 3mm banding for long term durability and aesthetics.

Unique curved corner and computer corner desks with standard keyboard platform allow executives comfortable pullup to computers. By eliminating back-to-the-door computing, these desks promote collaboration and communication, helping executives remain ready to receive colleagues and visitors.

Choose full or 3/4-height individually locking pedestals.

Drawers include smooth-action, captive steel ball-bearing slides. Full extension slides on all file drawers provide complete drawer access. Pre-installed filing hardware offers easy-adjust legal and/or letter filing front-to-back or side-to-side.

Extensive wire management standard. Accessory wall, accessories and tackboards all tailor offices to individual needs. Optional center drawers and keyboard supports available.

With two-tone colorations you can tailor **Atlas** to other elements, such as floors and walls.

Modularity = Flexibility

With 200+ modular components, **Atlas** can be configured to accommodate varying building structures, office designs and individual preferences. Address private and open offices, reception and conference area, plus storage/filing situations. Even more options are available through sister-series Hyperwork, including a full range of complementary corner hutches!
