

Transaction Link

What is Transaction Link?

With the Transaction Link application, users of Sage MAS 90™ and MAS 200™ accounting systems can use their Savin multifunctional products (MFPs) to scan supporting documents (such as a purchase order or packing list) and link the resulting electronic files to specific transactions within their existing accounting software.

What business issues does Transaction Link address?

- Verifying audit readiness in support of internal and external audits without having to pull paper files from folders.
- Producing accurate up-to-the-minute business information and financial reports without combing through paper-based filing systems.
- Providing strong security for supporting documents related to accounts receivable, sales order processing and other vital workflows.
- Improving critical financial processes and increasing overall profitability.

What can Transaction Link offer your customers?

- Transaction Link allows customers to do more with their current MAS 90 and MAS 200 accounting applications. It lets users link supporting documents to transactions for auditing purposes as well as report on missing documents.
- Transaction Link is ideal for accounting departments in virtually any small or medium-sized business that uses Sage MAS 90 and MAS 200 Accounting Systems. Transaction Link can be installed quickly because it is designed to integrate with these systems.
- Transaction Link is extremely easy to use. It relies on the familiar interfaces of current accounting systems and Savin MFPs, so it requires little or no training.
- Transaction Link allows organizations to streamline workflow at any stage in the growth cycle because it runs on such a wide range of Savin MFPs — from low-volume systems to high-volume solutions.

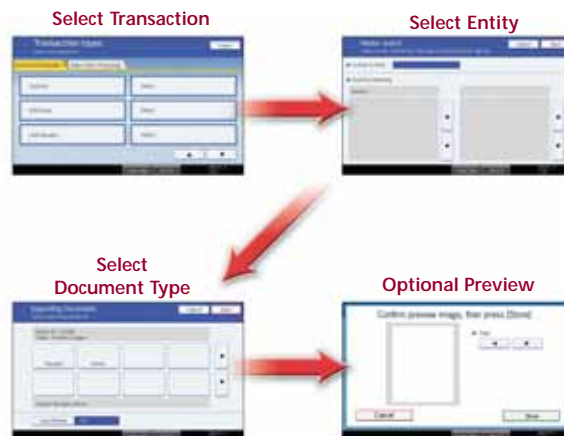

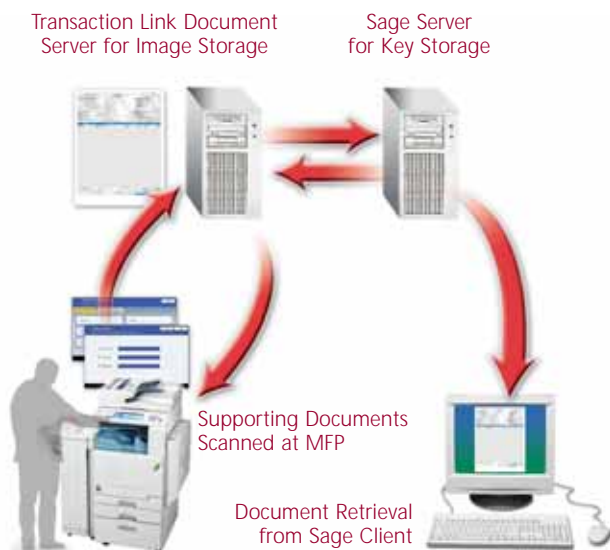

Transaction Link: Key Features and Benefits

- Increase cash flow while streamlining a wide range of document processes
- Improve document workflow efficiency, compliance, customer satisfaction and profitability by integrating with existing business processes
- Shorten days sales outstanding (DSO) by including supporting documents with reimbursement requests
- Confirm submitted receipts quickly and accurately
- Enhance ROI for existing business-critical accounting systems

How to qualify and engage a Transaction Link opportunity

Ask the following questions:

- Is your organization interested in minimizing hardcopy/paper documents?
- Does your organization need to comply with Sarbanes-Oxley?
- Does your organization have internal compliance regulations that require supporting documents be verified for transactions?
- What would happen if your organization could not produce needed financial supporting documents?
- Is your organization interested in supplementing or eliminating bar code cover sheets for scanning?

Transaction Link enables users to scan documents in and link them to Sage MAS 90 and MAS 200 Accounting Systems in four easy steps.

What is Sage MAS 90 and MAS 200 software?

MAS 90 and MAS 200 are industry-leading accounting management software solutions that support the needs of small- and mid-sized businesses in North America.

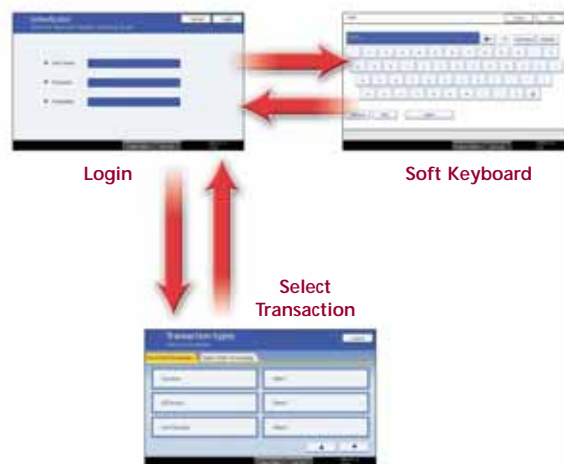

Recommended by more CPAs than any other application in its class, this product suite offers a broad selection of feature-rich modules that empower managers with the information they need to make profit and growth-driven decisions.

Accounting departments in any industry can install the Transaction Link solution to streamline workflow and reduce the need for manual filing, indexing and document retrieval.

After you identify an opportunity, a Transaction Link demo is the next step.

For information on a demo, please contact your regional Solutions Deployment Group (SDG) office. Any feedback or questions related to the product can also be relayed through SDG.
