

Desktop/Workgroup Scanners

Fujitsu desktop/workgroup scanners provide a solid foundation for any productivity-enhancing document management solution. They give users the ability to scan up to 2,000 pages per day and accommodate a wide variety of paper sizes, proving that you don't have to sacrifice performance for affordability.

Departmental Scanners

Fujitsu departmental scanners deliver the higher throughput and added features larger organizations demand, such as a robust document feeder, long document scanning and document imprinting. Adobe® Acrobat® Standard and Kofax® VRS are included, enabling users to scan to PDF files. Fast, SCSI and USB connectivity, plus TWAIN and ISIS® drivers, ensure easy integration.

Production Scanners

Production environments call for extremely high throughput, flexibility and reliability. Fujitsu production scanners satisfy these requirements, enabling users to scan up to 100,000 pages per day. They also feature superior paper-handling capabilities over a wide range of sizes and thicknesses, as well as document ultrasonic double feed detection, which enhances overall productivity.

About Fujitsu Computer Products of America, Inc.

Fujitsu Computer Products of America, Inc. is a subsidiary of Fujitsu Limited, a leading provider of customer-focused IT and communications solutions for the global marketplace. FCPA provides innovative solutions for the U.S. marketplace. Current product and service offerings include high performance hard disk drives, Magneto-Optical drives, scanners and scanner maintenance, palm vein recognition technology, 10Gb Ethernet switches and degaussers.

Scanner Product Guide

Manage your images, documents, budget and time.

Businesses of all sizes can benefit from document management solutions based on Fujitsu Computer Products of America, Inc. (FCPA) scanners. They deliver an unbeatable combination of affordability, reliability, innovation and performance. What's more, FCPA offers a wide variety of desktop/workgroup, departmental and production scanners to satisfy the needs of:

- ▶ Forms Processing
- ▶ Front Office
- ▶ Document Archival
- ▶ Workflow
- ▶ Service Bureaus
- ▶ and many other applications
