***SULTAN HEALTHCARE ANNOUNCES ZYMEX™
SUPER FOAMING ENZYMATIC SPRAY***

Foaming Pre Cleaner lasts 3 Times longer than leading competitor

ENGLEWOOD, NEW JERSEY, (March 2007) – Sultan Healthcare announces ZYMEX™ Super Foaming Enzymatic Spray, a foaming pre-cleaner that begins the instrument processing cycle, making cleaning easier and more effective.

After instruments are used, some may be placed on a tray or container in the open air. If untreated for a period of time, gross soils can harden, making the cleaning process a more difficult. A foaming pre-cleaner can be sprayed on immediately after instruments are used, to begin the cleaning process. Enzymes in formulation begin breaking down the bio burden that is left on the instruments, and the foaming properties keep instruments moist until they are transported into a central reprocessing area to be cleaned. And the foam is much lighter so the health care worker is not transporting heavy liquid filled containers that can spill.

ZYMEX™ Super Foaming Enzymatic Spray provides rich, thick foam that stays on instruments for up to four hours, three times longer than leading competitors, keeping soils moist longer. Many foams are runny and do not stay on instruments. ZYMEX clings to instruments vertical surfaces including serrated edges and grips.

ZYMEX™ offers a neutral pH formula; it is safe for use on medical instruments!

“ZYMEX Super Foaming Enzymatic Spray is a great addition to any instrument reprocessing cycle”, says Tim Lorencovitz, Infection Control Product Manager. “A quick spray prevents soils from hardening. This minimizes the need for manual scrubbing and running instruments through duplicate processing cycles, saving time and expense for the facility”

ZYMEX Super Foaming Enzymatic Spray is now available directly through Sultan’s global network of distribution partners.

Sultan Healthcare , established in 1872, is a leading manufacturer of infection control, dental materials, preventive products and oral therapeutics. Sultan distributes products through dental and medical dealers on every continent and maintains its global reach with an extensive network of highly trained field representatives.
