# Remote device

#### **Control Your Imaging** Costs with Sentry Onsite

Sentry Onsite will help you control imaging costs and increase office productivity. With this technology Copynet will collect your meters remotely, as well as service and supply your entire imaging fleet, proactively. Let the Copynet experts manage your fleet and free up your valuable time to focus on other core areas of your business.

### Here's How...

Sentry Onsite will remotely collect data metrics from the printers, copiers, fax machines and multi-function devices on your network. This technology coupled with our industry recognized service programs, will help you better manage the imaging devices in your environment and help you make better decisions about

when it makes sense to replace old devices.

# **The Power of Sentry Onsite**

- Extend the life of document output devices
- Free up valuable IT time from print related problems
- Optimize device placements
- Increase office productivity with a healthier fleet
- Reduce down time with preventative maintenance
- Submit meter readings automatically
- View the total cost of ownership associated with each device
- Make educated decisions about replacing your printing assets
- Create a print management strategy custom tailored for your office

### **Extensive Reporting Features**

Sentry Onsite allows you to view comprehensive information about your imaging devices including:

- Page counts
- Toner levels
- Device status
- LCD reading
- Device description
- Serial number
- Asset number
- Location
- Cost per copy tracking
- Utilization
- Trending reports
- More!

#### **Intelligent and Secure** Solution

The download and installation of the Sentry Onsite Data Collection Agent takes under 5 minutes, and our technical support team will walk you through the initial setup. From then on, the Data Collection Agent will run as a Windows service in the background. allowing it to operate 24 hours a day, 7 days a week.

## **Network and System Requirements**

- TCP/IP configured
- Port 80 (HTTP), Port 443 (HTTPS) or port 21 (FTP) must be open for automatic transmission of collected data
- Hardware: Desktop computer system Operating System: Windows
- 2000/XP

After each discovery, the collected data will be sent to Copynet's secure web server. This allows us to monitor and manage your printing environment remotely, without any intervention or distraction at the user level. No personal or user data is collected. The collected data is sent via Port 80, Port 21 or 443 to the web server.
