

bizhub 350

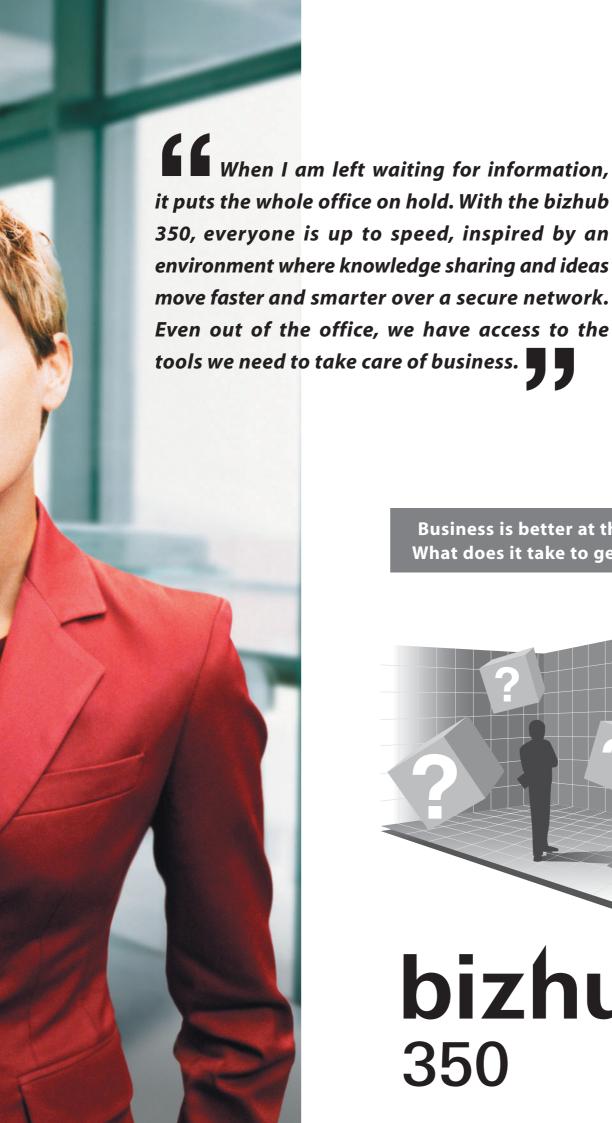

All-in-one MFP to drive your office at 35 ppm and empower information sharing

The essentials of imaging

Business is better at the hub. What does it take to get there?

bizhub 350

The answer is bizhub.

Put yourself at the hub of business

The bizhub concept

empowerment

Maximize the effectiveness of your information management by enabling dynamic information sharing between everyone in your office.

synergy

Fuel the creation of new ideas by giving employees the means to communicate quickly and effectively.

ubiquitous

Provide a secure network environment with seamless functionality for users while keeping data safe from unauthorized access.

Your offices people to wo

Your offices are spread over a large area but you need your people to work together as a team.

Energize your entire network, offering the bizhub 350's input and output capabilities to every connected PC regardless of location. Transmit information to all bizhub machines over your intranet while security features protect sensitive resources.

2

You need data to flow freely across your network, but not at the risk of losing control.

Scan hardcopy into the bizhub 350 to send to multiple destinations and use throughout your company. Software-based data and network solutions for users and administrators create an environment that's highly manageable.

3

You have great ideas but you need to centralize them so your people have total access.

The bizhub 350's HDD functions as a file server, pooling resources to stimulate idea sharing. Beyond advanced multi-tasking and communication functions that make the most of your archived resources, access to vital information is streamlined.

bizhub 350 features

- 35 ppm Network Printing
- 35 cpm Digital Output
- 41 & 70 opm Scanning at 600 & 200 dpi
- Scan and Send Functions
- Optional Faxing Functions
- Internet Fax (std.) & IP Fax (opt.)
- Automated Finishing Functions
- Security Functions
- Simitri Toner
- Universal Design
- 3,650-sheet Paper Capacity (max.)
- Network Management Solutions
- Document & File Sharing
- HDD Data Archiving

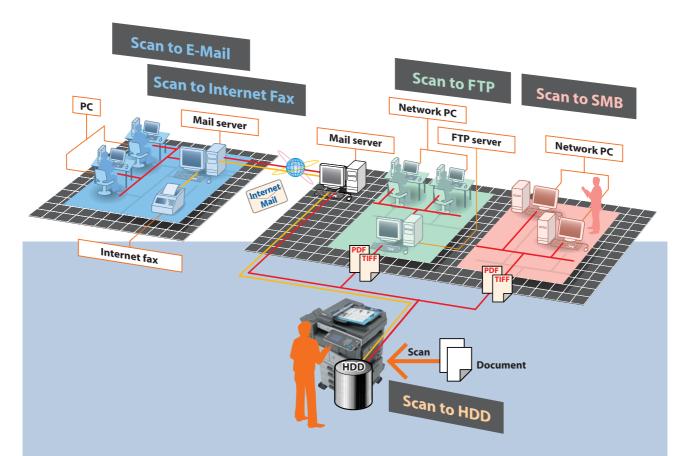

Scan and Send Functions

High-speed document digitilization is complemented by the ability to share softcopy and send it to a variety of destinations. Information flows more freely and is easier to archive.

Scan to HDD

With the optional HDD, archiving scan data on the bizhub 350 creates a valuable cache of centralized information that is easy to access and share.

Scan to E-mail

From the control panel, easily send scanned data as an e-mail attachment in PDF or TIFF format. Convenient one-touch buttons eliminate manual input to make scanning from the main unit even faster.

Scan to FTP

Upload your scanned data to an FTP server and designate the directory where you want it saved. Scan to FTP is ideal for sharing large files that would be difficult to send by other means.

Scan to SMB

Forwarding scanned data directly to the sharing folder of a client PC, document archiving and reuse is possible in a server-less environment.

Scan to Internet Fax

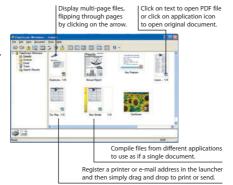

Scan your documents and send the data via TCP/IP to any Internet fax in the world. Besides saving on long distance and overseas transmission charges, with a full-time connection, you even eliminate local phone charges – ideal for companies with many regional offices.

Management

Document Management

PageScope Workware* (option)

Combining scan data and application data into an integrated PDF file is easy with PageScope Workware. Merge and divide documents or rearrange page order with a simple drag and drop. Individual pages can be selected and moved from one document to another, while a thumbnail mode lets you keep track of all edits at a glance. Image correction features include re-orientation of scanned data, removal of text traces from the opposite side of the original and image enhancement functions.

Cost Management

Account Track

Intelligent regulation of office resources is the basis of effective cost management. The bizhub 350's Account Track function curtails unnecessary output by letting administrators set copy, print, fax and scan limits for up to 1,000 departments or workgroups.

Device Management

PageScope Web Connection

Whether at your desk or over the Internet, browser-based PageScope Web Connection keeps you updated and in control of all Konica Minolta devices on your network without the need for additional software. This network utility gives your administrator real-time information on machine status and output volume, as well as letting users update print settings, input forwarding destinations for scan data and change one-touch fax dialing settings remotely.

PageScope Data Administrator

Easily upload e-mail addresses and fax numbers from networked PCs all at once. Uploading to multiple machines or updating information after reorganization is also automated. All contact

information can then be backed up on a client PC. Box function, user and Account Track settings can also be entered.

Resource Management

LDAP Compatibility

LDAP (Lightweight Directory Access Protocol) searches and displays user names, telephone & fax numbers and e-mail addresses from a database, which you can then group into

lists. LDAP makes inputting recipient information for faxes as well as address settings for Scan to E-mail easy.

Security

User Authentication

A built-in user registration and autheneven without a dedicated server. Settings let you restrict or allow use of copy, print, scan, Box and fax functions to users. Compatibility with an external authentication

SSL

Unprotected, your data is prone to falling into the wrong hands. The bizhub 350 uses SSL encryption to ensure the confidentiality of your sensitive information as it is transferred over your network.

Data Erase

After data is scanned and printed out or faxed, it is deleted from the Box where it was stored, while the remaining image data is overwritten to prevent sensitive information from being accessed. In addition, discarding or moving.

Secure Print

With Secure Print users can add a password to print data they forward to the bizhub 350. Data is temporarily stored in the Document Box and printing only begins after the user inputs the password at the control panel, ensuring that sensitive documents are not seen by others.

IP Filtering

Output permission or restriction can be assigned to individual IP addresses or a range of IP addressees, ensuring only authorized users have access to output functions.

Scan to E-Mail SMTP Authorization

This feature enables Scan to E-mail to that employ SMTP authentication to block viruses and unsolicited messages.

HDD Password Lock

The HDD can be assigned a password, preventing unauthorized users from accessing HDD data, even if the HDD is removed from the main unit.

Compatibility with Multiple Protocols

Ready to go to work in your network environment, the bizhub 350 is compatible with 10BASE-T/100-BASE-TX Ethernet standards and most leading client-server protocols including TCP/IP, IPX/SPX, SMB, LPD, IPP and AppleTalk (PAP).

Compatibility with Multiple OS

Compatible with the most common office operating systems including Windows XP and Mac OS X.

Internet Printing

Authorized users have full access to the bizhub 350's printing and finishing capabilities from any internet-ready computer thanks to compatibility with the Internet Printing Protocol (IPP).

A Wide Range of Print Functions

■ Proof & Print

Lets you input settings and output a single document for checking before beginning your entire run

■ Overlay*

Combines data saved in the HDD, such as company letterhead, with scanned data to produce new documents

*requires optional HD-504. Only with PCL 6 driver

■ File Margin

Shifts contents to prevent stapling and hole punching through text and images

■ Watermark

Adds text to help manage documents

■ N-in-1

Combines 2, 4, 6, 9 or 16 pages on a single sheet

■ Booklet Mode*

Automatically paginates documents for binding or folding

requires optional FS-508 & SD-502.

■ Cover Sheet Insertion

Lets you add pre-printed, colored or thick paper covers

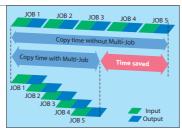

Quick Copying

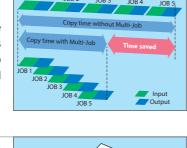

In business, time is a precious commodity. That's why the bizhub 350 places priority on speed. With a warm-up time of just 14 seconds after turning on auxiliary power, a first copy output time of 4.8 seconds and copying at a brisk 35 cpm, you'll have more time to prepare and deliver your presentation.

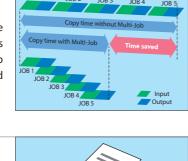

Multi-Job Function

Reducing wait time to increase office efficiency, the Multi-Job Function* allows you to scan a document while the bizhub 350 is printing, or queue up to 5 spooled jobs from client PCs while scanning.

*Requires the optional Hard Disk HD-504.

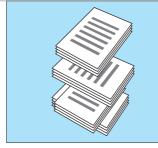

Sorting without a Finisher

Even without an optional finisher, the Electronic Sort Function automatically sorts A4 and B5 size documents to eliminate manual labor. Paper trays must be set with both horizontal and vertical A4 or B5 sheets. This function cannot be used while the Finisher FS-508 is attached.

Digital Editing Functions

■ B/W Reverse

Prints negatives of scanned originals

■ N-in-1

Scans and outputs multi-page documents as 2-per-page or 4-per-page documents

■ Image Repeat

Reproduces small scanned documents on the same sheet as many times as possible

■ Stamp

Adds embedded labels such as "Confidential" or "Top secret" to copies

■ Set Numbering

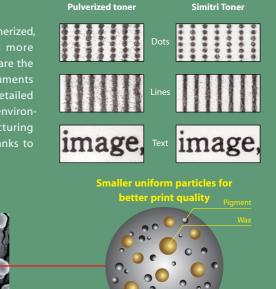

Helps keep track of multiple sets of sensitive documents with a sequential distribution number

Simitri

Simitri Toner

making each particle smaller and more uniform in size. These finer particles are the secret to consistently printing documents with noticeably sharper text and detailed gradations. Simitri toner minimizes environprocess and uses less electricity thanks to low-temperature fixing.

Finishing & Paper Handling

■ Stapling Functions

2-position stapling (left side or top)

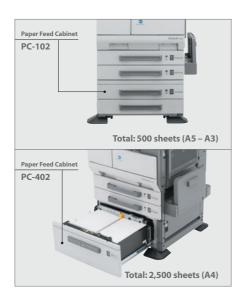

Finishing Functions

With a wide range of finishing options, you have total control over document creation, easily producing a professional look that's sure to leave a powerful impression. Automated corner staple, center double staple, top and left hole punching ensure your documents are ready to be distributed or filed immediately after output. Saddle stitching and folding options give you the ability to create bound booklets of up to 60 pages (15 sheets) for use as sales tools or in presentations. When documents are finished printing, offset shifts output into highly managable stacks.

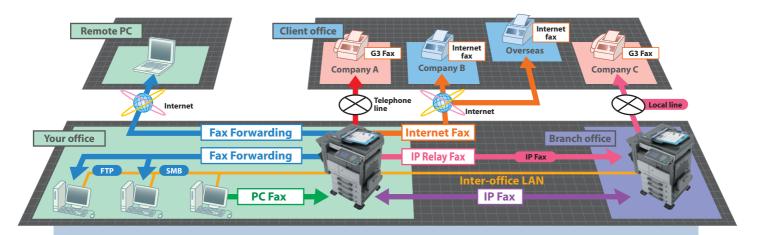

Paper Handling

The 150-sheet multiple bypass tray can handle diverse paper sizes and media including thick paper, transparencies, labels and envelopes. Your choice of 3 optional paper feed cabinets, handling up to 2,500 sheets of A4 paper, satisfy a variety of output and print volume needs. Even if paper from one tray runs out during printing, automatic tray switching locates the same paper size from another tray to continue printing without interruption.

Faxing

Super G3 Fax (option)

Equipped with Super G3, the international standard for high-speed fax communication, the bizhub 350 can transmit a fax image of an A4 page in under 3 seconds* (700 characters, standard quality) over an ordinary phone line. By improving transmission speed, you can greatly reduce costly phone charges.

*Data transmission time only. Does not include paper feed and output times

Internet Fax (standard)

Instead of requiring a dedicated phone line, Internet Fax transmits data over the Internet, similar to e-mail. This is ideal for offices that often send long faxes overseas and want to reduce costs.

IP Fax & IP Address Relay (option)

Send faxes directly to any other compatible bizhub device on your intranet simply by selecting the IP address. IP Address Relay lets you forward to a bizhub device for relaying to a local G3 fax machine. Since IP Fax utilizes your pre-existing network infrastructure, there are no additional fees.

IP Fax to G3 Fax (option)

The bizhub 350's new automatic redirection feature reroutes IP Fax messages to a registered fax machine when the recipient's server is down. Since you are sending the fax via your intranet, you only incur a local phone charge and are assured that your message will arrive.

PC Fax (option)

Send data to a fax machine right from your PC using the bizhub 350. Since the soft copy remains on your PC, it's readily available for retransmission, reference or reuse. And because documents don't need to be printed, you can reduce paper waste throughout your office.

Dual Fax Ports (option)

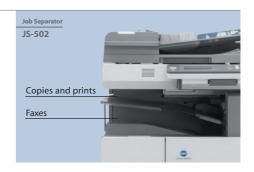

For offices dependent on the flow of fax information, dedicated lines for incoming and outgoing faxes are a must. Dual fax ports* enable you to receive while transmitting or simultaneously send faxes to 2 separate machines. With an optional output tray, you can even sort incoming messages by phone line.

*Requires optional Fax Multi Line ML-502.

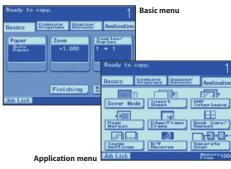

Job Separator

The optional Job Separator JS-502 slides into the main body to separate output by source. Copy and print documents come out on the top tray and faxes on the bottom.

Universal Design

User-friendly Control Panel

The adjustable control panel can be set at 3 angles – 7° , 26° and 43° – to accommodate every user in your office. Beyond ergonomics, an intuitive layout complements the LCD's straightfor-

ward GUI.

Universal Access RADF

A translucent paper guide and angled ruler facilitate viewing from low angles. The upper tray is equipped with grips that make it easy to lift with either hand. The input and output trays feature rails to improve access.

High Contrast Design

The RADF and output trays employ dark colors that contrast sharply with paper to improve visibility and ensure that important documents don't get left behind.

Effortless Toner Replacement

With frontal access to the toner bottle, making replacements is a simple task. Simply open the cover and insert a new bottle into the toner hopper - even while copying.

Tray Access

All paper trays feature a smart design with grips that can be accessed from either the top or bottom. Replenishing paper has never been more convenient.

Compact Design

Empower your office without overwhelming it. A compact footprint of only 677 x 710mm (987mm with multiple bypass tray open) fits comfortably into any space, delivering the advantages of a larger MFP at a more manageable size.

bizhub

Specifications

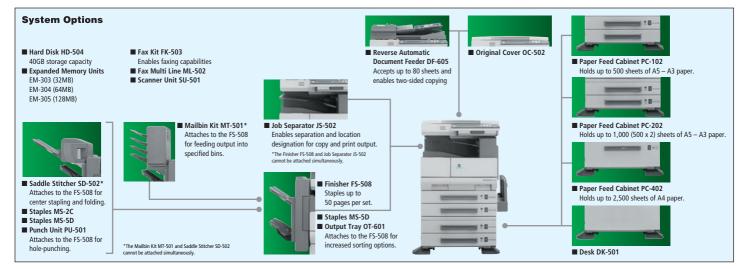

Model name			bizhub 350
Туре			Digital Copier / Printer / Scanner
Resolution			600 dpi x 600 dpi
Gradation			256 levels
Memory	,		192MB standard (32MB used for file memory)
Type of originals			Sheets, books, 3D objects
Maximum doc	ument :	size	A3 (297 x 420mm)
Copy size	Paper	size	A5 to A3, B6 lengthwise
	Non-e	ffective	Top & bottom edges: 4mm
	image	area	Right & left edges: 4mm
Warm-up time			14 sec. or less (aux. power); 24 sec. or less (main power) with std. config.
First copy time	<u> </u>		4.8 sec.
Copy speed			35 pages/min. (A4)
Magnification	Fixed	Enlargement	x 1.154, x 1.414, x 2.000
	ratio	Reduction	x 0.930, x 0.816, x 0.707, x 0.500
	Zoom		x 0.250 to x 4.000 (in 0.001 increments)
Paper capacity			1,150 sheets
Paper weights			56g/m² – 90g/m²; 91g/m² – 210g/m² thick paper and OHP sheets
			from multiple bypass tray
Multiple copy			Up to 999, Countdown, Interrupting capability
Double-sided	copying	1	Stackless ADU (standard)
Power require	ment		220-240V, 6.3A + up to 10% (50/60Hz)
Power consum	ption		1,300 – 1,470W + up to 10%
Dimensions (W	/ x D x	H)	677 x 710 x 718mm
Weight			74kg

Optional Fax Functions (Fax Kit FK-503)

16 dots/mm x 15.4 lines/mm, 8 dots/mm x 15.4 lines/mm,
8 dots/mm x 7.7 lines/mm, 8 dots/mm x 3.851 lines/mm
