
Wood Seating Specification Guide

What's New?

What's New information is now available on the in2.steelcase.com Web site. Go to *What's New*, then *Show News by Category*, then *Incentives, Pricing, Promotions*.

► See the *Specification Guide Library: Reference Guide* for information about where to find products.

Availability

Electronic price list updated with release 158.C (U.S.) and 135.C (Canada), dated July 19, 2004.

► For a list of all trademarks, refer to the last page of this specification guide.

For Canadian Pricing

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by 1.38.
- Round each to the nearest dollar.
- Add base and options for total list price.

Guidelines for Selecting Appropriate Ergonomic Seating

<p>General-Use</p>	<p>High Interaction Low</p>	<p>General-Use Seating</p> <p>Group Communicating Group Collaborating</p> <hr/> <p>High-Performance Seating</p> <p>Individual Processing (task intensive) Individual Analyzing/Creating (multi-task)</p>	<ul style="list-style-type: none"> • Short periods of sitting • Moderate computer use • In some cases, a general-use chair can be used for short-term, individual analyzing/creating. 	
<p>High-Performance</p>			<ul style="list-style-type: none"> • Long periods of sitting • Heavy computer use • The more repetitive the task (individual processing work), the more critical it is to have a high-performance chair with full adjustability. 	
<p>Executive</p>		<p>Executive Seating</p>	<p>Today's executive is an active participant, not just a delegator. Image is very important in the executive suite, but time at the computer must also be a consideration. Whether image or ergonomics drive the choice, this range of seating is diverse to provide the perfect chair for any executive work setting.</p>	<ul style="list-style-type: none"> • Design that acknowledges image • Aesthetics and detailing that suit the setting • Ergonomic features matched to the kinds of work
<p>Guest</p>		<p>Guest Seating</p>	<p>Guest seating must be adaptable to many roles: as side chairs, pulled up to the conference table, in the learning center, in the private office, or in high-traffic areas where long use-life is essential. Guest seating is not intended for long periods of seated work, but must provide short-term comfort and have a welcoming, comfortable look.</p>	<ul style="list-style-type: none"> • A style in harmony with the other furniture • A scale that suits the environment • A durability that fits the intended use
<p>Stackable</p>		<p>Stackable Seating</p>	<p>Stackable seating is used when occasional, transportable, easy-to-store seating is needed. Whether used as side chairs, meeting chairs, in classrooms, or cafeterias, the challenge is to maintain an excellent aesthetic combined with great strength even though the chairs are light in scale for portability.</p>	<ul style="list-style-type: none"> • Durability for high-volume, high-traffic use • Light weight for easy stacking and moving • Extra features if needed, such as tablet arms, bookracks, glides, transport and storage dollies, and ganging or alignment devices.
<p>Lounge</p>		<p>Lounge Seating</p>	<p>Lounge seating is often multiple and is found throughout the organization from reception areas to executive offices. The selection is the broadest of any of our categories, ranging from traditional leather sofas to school and hospital seating. Lounge seating is the "first impression seating," critical to an organization's image.</p>	<ul style="list-style-type: none"> • Durability related to level of use • A design that looks right in multiples • Size, scale, and appearance that suits the environment

Basics of Ergonomic Seating

Proper ergonomic seating can help workers perform more efficiently and avoid muscle and eye strain.

Neck is straight or slightly forward.

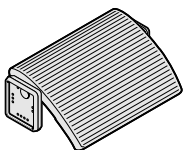

Shoulders are relaxed so arms hang naturally.

Back has full contact with the backrest (sit all the way back in your chair).

Elbows and forearms can rest comfortably on the arms of your chair, or on worksurfaces that are used for writing, paperwork, and other tasks.

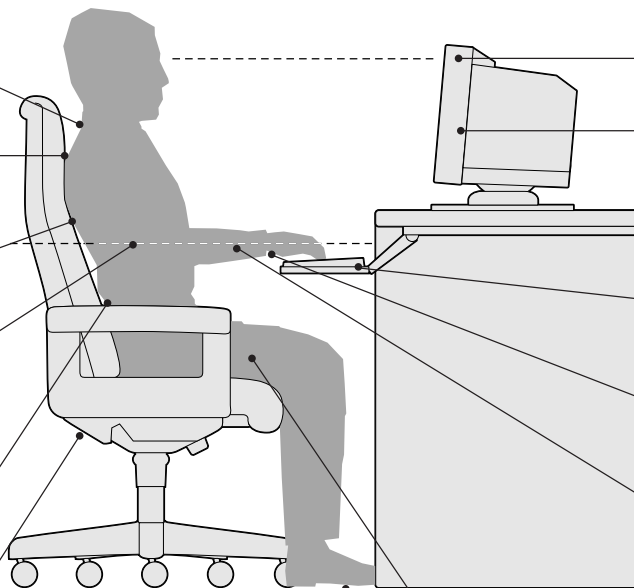

Lower back fits into curved lumbar support.

Tension is adjusted so backrest tilts easily, yet provides smooth, even support.

If worksurfaces and keyboard support are not height-adjustable, raise your chair's seat height to achieve the appropriate relationship to your tasks. If this leaves your feet dangling above the floor, use a Details footrest.

Call Details, 1.800.833.0411, or your Steelcase dealer, for additional information or price list.

Top of monitor should be at eye level.

Screen is 20 to 30 inches from the eyes.

Screen is at eye level or slightly lower and directly in front of worker so head is not turned.

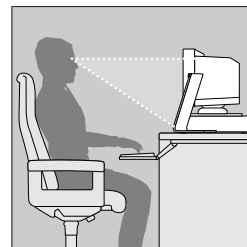

Keyboard is at elbow height.

Wrists should be straight when keying or mousing, not bent up or down.

When keying or mousing, forearms are parallel to the floor.

Thighs are parallel to the floor.

Feet are flat on the floor or on a footrest.

Keep frequently viewed objects, such as a VDT or source document, at or below the horizontal line of sight. Arrange display screen and documents to be equidistant from your eyes.

ANSI/HFES is the American National Standards Institute/Human Factors & Ergonomics Society. This organization's 1988 guidelines cover the ergonomic needs of task workers. These guidelines are currently under revision.

ANSI/BIFMA is the American National Standards Institute/Business and Institutional Furniture Manufacturer's Association. All Steelcase furniture meets or exceeds ANSI/ BIFMA standards for structural quality.

Basics of Adjustability

Steelcase chairs offer varying levels of adjustability to meet the needs of many types of users. Adjustable chairs may offer one or more of these features:

Synchro-tilt feature means the chair back and seat are synchronized to move in a 2:1 ratio. When the user leans back, the seat rises only half as much, allowing the user's feet to remain flat on the floor.

Advanced swivel-tilt feature incorporates a no front-rise design that allows the seat to remain level even when the user leans back.

Swivel-tilt feature means the chair back and seat are fixed together and move in unison. When the user leans back, the seat rises so that the back-to-seat angle remains constant.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Swivel feature allows the user to rotate the seat 360 degrees in either direction.

Pneumatic-height adjustment allows the user to remain seated while adjusting the seat height by way of a control button or lever.

Manual-height adjustment allows the user to raise and lower seat height by spinning the seat while keeping the base stationary. Cannot be done from seated position.

Seat-angle adjustment allows the user to change the angle of the seat to a forward position. Available on Gentry knee-tilt models only.

Back-tension adjustment allows the user to control the amount of resistance felt when leaning back in the chair.

Variable back stop allows the user to lock the back upright and to preset their range of recline.

Variable back lock allows the user to lock and unlock the backrest in any position within the tilt range.

Upright back lock allows the user to lock the backrest in a full upright position or release it for full tilt motion.

Wood seating products are supported with an array of informational materials, tools, and software to help you plan an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office, by calling 1.800.784.0355, or through the Steelcase Marketing Communications Web site at in2.steelcase.com.

Surface Materials

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials and their categories
- “Available on” matrices
- Vertical surface fabric and seating upholstery selection listing
- Pricing for surface materials
- Technical data for surface materials
- Surface material care and cleaning instructions

Additional surface materials specification tools

are available to assist you in the specification process—the Surface Materials Binders and the Surface Materials Tool Box.

Surface Materials Finishes Binder

- includes:
- Surface Materials Reference Manual
 - A complete set of swatch cards for hard surfaces

Surface Materials Vertical Surface Fabric Binder

- includes:
- A complete set of swatch cards for vertical surface fabric

Surface Materials Seating Upholstery Binder

- includes:
- Designtex Graded-In Catalog
 - A complete set of swatch cards for seating upholstery

Surface Materials Tool Box

provides 3" x 3" samples of the following surface materials:

- Vertical surface fabric
- Seating upholstery
- Wood veneer
- Paint
- Laminate

Form number S8150

Customer's Own Material (COM) Web site

features fabric test results for all COM fabrics which have been tested by Steelcase and also allows you to calculate yardage requirements for most Steelcase seating lines. The Web site will always contain the most current information available, providing the same information you would receive if you called or faxed a COM Consultant. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated quarterly by Steelcase and provided to software programs like the Hedberg Business System, 20-20 CAP Studio, and 20-20 Office Sales.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information on these and other software tools to help you plan effective work environments, please contact Steelcase eTools at 1.616.246.9542.

Product Info

Electronic versions of this and many other specification guides in Acrobat PDF (Portable Document Format) allow you to scan, search, and print any page on virtually any computer. You can access these files at the Steelcase.com Web site or My Sales Online at in2.Steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfilled Team at 1.888.STEELCASE (1.888.783.3522).

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfilled Team if you have submitted an order to Steelcase and you need to speak to your service representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

Executive Seating

Breton	18
Collegium	22
Decorum	26
Mansfield	30
Masque	34
Theorem	38

Breton

Breton chairs, designed by David Jenkins, combine ergonomic comfort with elegance and fine craftsmanship for executive offices and conference room settings.

Handcrafted leather upholstery is standard.

Upholstered arms are enclosed.

Seat height adjusts from 18¾"H to 21¼"H; pneumatic-adjustment mechanism is standard on executive models.

Five-arm metal base is black with maple wood base caps.

Interlocking cushions flex independently to cradle every motion.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

Product Details

High- and mid-back models are available for executive applications. Conference seating is available in mid-back models only.

Coordinated articulation in seat and back provides balanced support through the work day.

Optional perforated leather seat and back add ventilated comfort.

Contoured foam backrest, on conference models only, provides lumbar support.

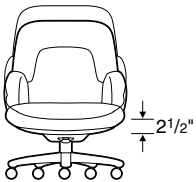

Actual Dimensions

	High-Back Desk Chairs	Mid-Back Desk Chairs	Conference Chairs
Overall depth	26¾"	27½"	27½"
Overall width	27¼"	27¼"	27¼"
Overall height	42"–44½"	38"–40½"	38"
Seat depth	19"	19"	19"
Seat width	19"	19"	19"
Back width	26¾"	26¾"	26¾"
Back height	25⅝"	21½"	21½"
Width between arms	19"	19"	19"
Seat to floor height	18¾"–21¼"	18¾"–21¼"	18¾"
Arm height from floor	25"–27½"	25"–27½"	25¾"

Adjustability Features

- Pneumatic height (standard on Executive models)
- Variable-position back lock
- Back tension control
- Synchro-tilt mechanism

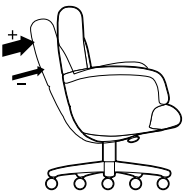

Adjustment Features

Pneumatic-seat adjustment, standard on executive models only, permits push-button height control. To lower, pull lever on right side while seated. To raise, pull lever and lift your weight off the chair.

Variable position back lock locks at various tilt angles, including fully upright. To set back angle and back tilt, push the back of button and lean back to desired position. Release button to lock back. Push the front of the button to release the back for free movement.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Synchro-tilt mechanism provides synchronized back movement while feet remain flat on the floor.

Surface Materials

Seat, back, and arms

- Leather
- Customer's Own Leather (option)
- Perforated leather (option on insert)

Column

- Black metal only

Base

- Black metal with maple wood base caps
- Customiz stain on wood (option)

Casters

- Black only

Programs & Services

▶ See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil-retardant treatment is not available.

Fire Code Seating (FCS) modification is not available.

Local codes may have special requirements for upholstery.

Collegium

Collegium chairs, designed by Arnie Dammermann, feature contemporary styling that compliments a variety of office environments.

Seat height adjusts from 16"H to 21 1/2"H and is available with manual or pneumatic adjustment mechanism.

Five-arm base is standard in black aluminum. Solid maple base caps are optional.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

Lumbar contours provide lower back support.

Waterfall front edge eases pressure under user's legs and enhances circulation.

Synchro-tilt mechanism

Product Details

High-back and mid-back models feature gently rounded contours and a sculptured silhouette.

Arms are either enclosed upholstered or open upholstered with hardwood trim.

Extended-depth seat option, at 17 1/2"D, adds 1 1/2" to accommodate longer legs.

All Collegium chairs comply with ANSI/HFS and BIFMA standards.

Exception: The extended seat option exceeds ANSI/HFS seat depth restrictions.

Optional perforated leather seat and back add ventilated comfort.

Actual Dimensions

	High-Back Desk Chairs		Mid-Back Desk Chairs	
	Open arms	Enclosed arms	Open arms	Enclosed arms
Overall depth	25 1/2"	25 1/2"	25 1/2"	25 1/2"

Overall height	45"–50 1/2"	45"–50 1/2"	40"–45 1/2"	40"–45 1/2"
Seat depth	16"	16"	16"	16"
Seat width	20 1/8"	20 1/8"	20 1/8"	20 1/8"
Back width	20 1/8"	20 1/8"	20 1/8"	20 1/8"
Back height	30"	30"	25"	25"
Width between arms	20"	20"	20"	20"
Seat to floor height	16"–21 1/2"	16"–21 1/2"	16"–21 1/2"	16"–21 1/2"
Arm height from floor	24"–29 1/2"	24 1/4"–29 3/4"	24"–29 1/2"	24 1/4"–29 3/4"

Adjustability Features

- Manual height
- Pneumatic height
- Variable back stop
- Back tension control
- Synchro-tilt mechanism

Adjustment Features

Synchro-tilt mechanism provides synchronized back movement while feet remain flat on floor.

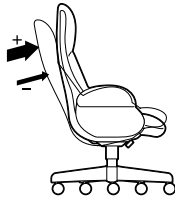

Manual-height adjustment is standard. Rotating the unoccupied chair raises or lowers the seat. Occupant's weight disengages the adjustment mechanism, so height won't change while chair is in use.

Pneumatic-height adjustment is available to allow push-button control of seat height from 16"H to 21½"H. To lower, pull lever on right side while seated. To raise, pull lever and lift your weight off the chair.

Variable back stop allows the back to stop at various tilt angles, including upright. Flick switch forward for full range of back angles. To limit back angle, recline to the desired position and flick switch back.

Tip: To lock in upright position, remove weight from back and flick switch back.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Surface Materials

Upholstery

- Vinyl
- Fabric
- Fabric with soil-retardant treatment (option)
- Leather
- Perforated leather on seat and back (option)

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Standard, as well as State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the \$17 upcharge.)

- Canzoné
- Cavalcade
- Jacks
- Link
- Regis
- Roulette
- Spyder
- Sweepstakes

Soil-retardant treatment is available on all other seating fabrics at an additional \$17 U.S. per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Sales Service representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 142–145 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Fire code approval:

Collegium enclosed-arm models 411 and 421 and all variations of these models are available in the following fabrics only:
Leather
Vinyl

Local codes may have special requirements for upholstery.

Decorum

Decorum chairs, designed by Arnie Dammermann, merge European classic camel-back appearance with ergonomic integrity and comfort that is vital in today's workplace.

Tufted back insert (optional) accentuates traditional styling.

Seat height adjusts from 16"H to 21½"H and is available with manual or pneumatic adjustment mechanism.

Five-arm base is standard in black aluminum. Solid maple base caps are optional.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

Lumbar contours provide lower back support.

Waterfall front edge eases pressure behind user's legs and enhances circulation.

Synchro-tilt mechanism

Product Details

Plain-back insert is standard with high-back, and mid-back.

Tufted insert is available for an alternative traditional look. Add suffix **T** to style number.

Five-arm base is standard, in black aluminum. Solid maple base caps are optional.

Extended depth seat option, at 17½"D, adds 1½" to accommodate longer legs.

Arms are either enclosed upholstered with modified scroll detail, or open upholstered with wood trim.

All Decorum chairs comply with ANSI/HFS and BIFMA standards. *Exception: The extended seat option exceeds ANSI/HFS seat depth restrictions.*

Optional perforated leather seat and back insert adds ventilated comfort.

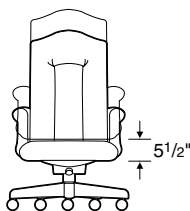

Actual Dimensions

	High-Back Desk Chairs		Mid-Back Desk Chairs	
	Open arms	Enclosed arms	Open arms	Enclosed arms
Overall depth	25"	25"	25"	25"
Overall width	27½"	27½"	27½"	27½"

Seat width	20⅞"	20⅞"	20⅞"	20⅞"
Back width	20⅞"	20⅞"	20⅞"	20⅞"
Back height	30"	30"	25"	25"
Width between arms	20"	20"	20"	20"
Seat to floor height	16"–21½"	16"–21½"	16"–21½"	16"–21½"
Arm height from floor	24"–29½"	24¼"–29¾"	24"–29½"	24¼"–29½"

Adjustability Features

- Manual height
- Pneumatic height
- Variable back stop
- Back tension control
- Synchro-tilt mechanism

Adjustment Features

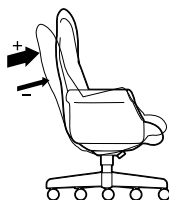

Manual-height adjustment is standard. Rotating the unoccupied chair raises or lowers the seat. Occupant's weight disengages the adjustment mechanism, so height won't change while chair is in use.

Pneumatic-height adjustment is available to allow push-button control from 16"H to 21½"H. To lower, pull lever on right side while seated. To raise, pull lever and lift your weight off the chair.

Variable back stop allows the back to stop at various tilt angles, including fully upright. Flick switch forward for full range of back angles. To limit back angle, recline to the desired and flick switch back.

Tip: To lock in upright position, remove weight from back and flick switch back.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Synchro-tilt mechanism provides synchronized back movement while feet remain flat on the floor.

Mansfield

Desk Chairs

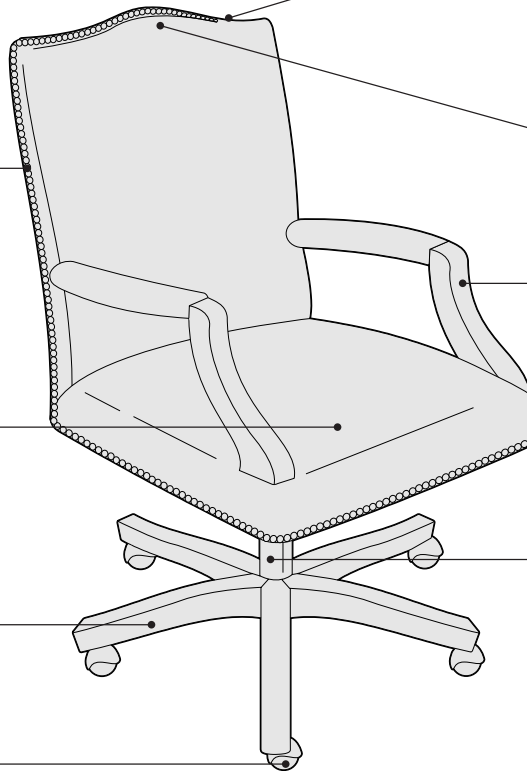

Mansfield desk seating is a cost-effective, traditional collection with Chippendale aesthetics. Mansfield desk chairs complement Monarch and Churchill wood case-goods.

Brass tack accenting is optional.

Seat height adjusts from 18½"H to 21½"H. Pneumatic adjustment mechanism is standard.

Five-arm base with maple base caps is standard.

Antique brass-hooded ball casters are standard.

Welting on back is standard.

Camel back enhances traditional styling.

Arms are solid maple with upholstered arm rests.

Knee-tilt/low front rise mechanism with upright back lock is standard.

Product Details

Mid- and high-back desk chairs are available.

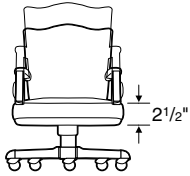

Five-arm base provides optimum balance. It is standard with maple base caps that are stained in the selected wood color.

Actual Dimensions

	High-Back Desk Chairs	Mid-Back Desk Chairs
Overall depth	30½"	28½"
Overall width	24½"	24½"
Overall height	43⅞"–46⅜"	38¾"–41¼"
Seat depth	19½"	19½"
Seat width	19"	19"
Back width	21"	21"
Back height from seat	27½"	22½"
Width between arms	19"	19"
Seat to floor height	17⅝"–20⅛"	17⅝"–20⅛"
Arm height from floor	25⅜"–27⅞"	25⅜"–27⅞"

Adjustability Features

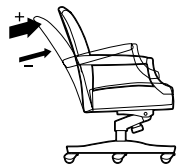

- Pneumatic height
- Knee-tilt mechanism
- Upright back lock
- Back tension

Adjustment Features

Pneumatic-height adjustment, standard on all desk chair models, allows seat height adjustment from 17⁵/₈"H to 20¹/₈"H with fingertip pneumatic lever. To lower, hold handle up while seated. To raise, hold handle up and lift your weight off the chair.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Upright back lock. To lock back upright, push lever down while sitting upright. To release back lock, pull lever up while sitting upright.

Masque

Contemporary executive open arm desk chair. Thin, angular profile upholstered in leather and vinyl.

Fully upholstered outer back is standard.

Seat is generously proportioned in both depth and width. Seat height adjusts from 16"H to 19"H with standard pneumatic adjustment mechanism.

Five-arm base is metal with a black plastic overlay.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

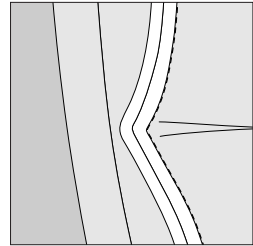

Inside surfaces are upholstered in leather. Outside back is upholstered in matching vinyl.

Lumbar contours provide lower back support.

Open arms are plastic with leather upholstered arm caps.

Waterfall front edge eases pressure on the backs of the user's legs and enhances circulation.

Product Details

High-back executive desk chairs are accented with stitching detail.

Five-arm base provides optimum balance.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Actual Dimensions

Overall depth	28"
Overall width	25 ³ / ₄ "
Overall height	42"-45"
Seat depth	19 ¹ / ₂ "
Seat width	20 ³ / ₄ "
Back width	20 ³ / ₄ "
Back height	26 ⁵ / ₈ "
Width between arms	20"
Seat to floor height	16"-19"
Arm height from floor	26"-29"

Adjustability Features

- Pneumatic height
- Upright back lock
- Back tension
- Knee-tilt control

Adjustment Features

Seat height adjusts pneumatically.

To lower, hold handle up while seated. To raise, hold handle up and keep your weight off the chair.

Upright back lock. Push the pneumatic height control lever into lock, pull the lever out to tilt.

Back tension control adjusts by turning a knob. Turn knob clockwise to increase tension and counterclockwise to decrease tension.

Surface Materials

Upholstery

- Black leather and vinyl
- Burgundy leather and vinyl

Tip: All inside surfaces are upholstered in leather and outside surfaces are upholstered in matching vinyl.

Samples of the leather are not available. However, they are similar in color to Steelcase L107 Black and L507 Vineyard leather.

Arms

- Black open arms with upholstered arm caps

Base and column

- Black base and column

Casters

- Black only

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

Soil retardant treatment is not available.

Fire Code Seating (FCS) modification is not available.

Local codes may have special requirements for upholstery.

Theorem

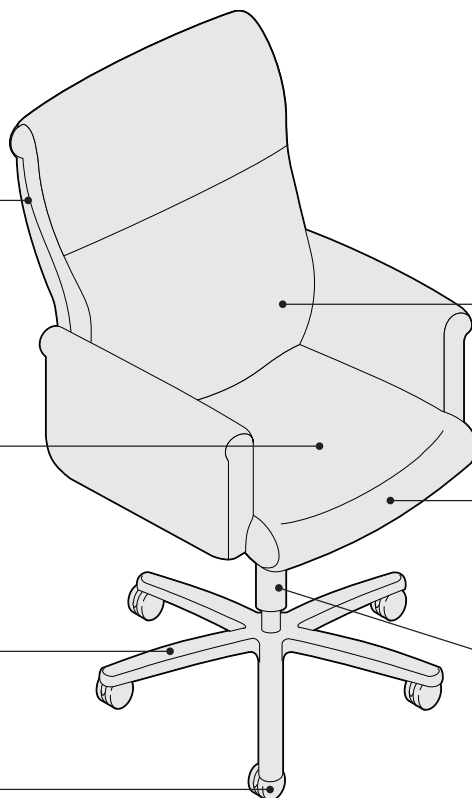

Theorem desk chairs, a Lisa Smith design, have a neutral, rectilinear design that is appropriate in contemporary or transitional settings. This chair line offers numerous ergonomic support features.

Double stitching accents the back and seat.

Seat height adjusts from 16"H to 21½"H and is available with manual or pneumatic adjustment mechanism.

Five-arm base is standard in black aluminum. Solid maple base caps are optional.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

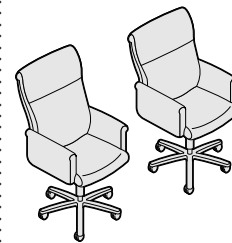

Lumbar contours provide lower back support.

Waterfall front edge eases pressure under user's legs and enhances circulation.

Synchro-tilt mechanism

Product Details

High- and mid-back desk chairs are available.

Enclosed arms are upholstered.

Extended-depth seat option, at 17½", adds 1½" to accommodate longer legs.

All Theorem desk chairs comply with ANSI/HFS and BIFMA standards.

Exception: The extended seat option exceeds ANSI/HFS seat depth restrictions.

Optional perforated leather seat and back adds ventilated comfort.

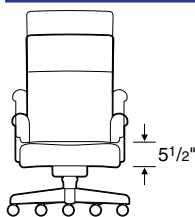

Actual Dimensions

	High-Back Desk Chairs	Mid-Back Desk Chairs
Overall depth	25"	25"
Overall width	27"	27"
Overall height	45"–50½"	40"–45½"
Seat depth	16"	16"
Seat width	20½"	20½"
Back width	20½"	20½"
Back height	30"	25"
Width between arms	20½"	20½"
Seat to floor height	16"–21½"	16"–21½"
Arm height from floor	24¾"–30¼"	24¾"–30¼"

Adjustability Features

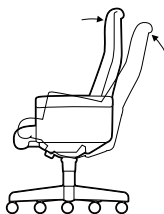

- Manual height
- Pneumatic height
- Variable back stop
- Back tension control
- Synchro-tilt mechanism

Adjustment Features

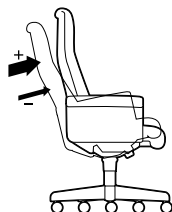

Manual-height adjustment is standard. Rotating the unoccupied chair raises or lowers the seat. Occupant's weight disengages the adjustment mechanism, so height won't change while chair is in use.

Pneumatic-height adjustment is available to allow push-button control from 16"H to 21½"H. To lower, pull lever on right side while seated. To raise, pull lever and lift your weight off the chair.

Variable back stop allows the back to stop at various tilt angles, including fully upright. Flick switch forward for full range of back angles. To limit back angle, recline to the desired position and flick switch back.
Tip: To lock in upright position, remove weight from back and flick switch back.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Synchro-tilt mechanism provides synchronized back movement while feet remain flat on floor.

Surface Materials

Upholstery

- Vinyl
- Fabric
- Fabric with soil-retardant treatment (option)
- Leather
- Perforated leather on seat and back (option)

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Standard, as well as State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the \$17 upcharge.)

- Canzoné
- Cavalcade
- Jacks
- Link
- Regis
- Roulette
- Spyder
- Sweepstakes

Soil-retardant treatment is available on all other seating fabrics at an additional \$17 U.S. per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Sales Service representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 142–145 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

General-Use Seating

Ascot	44
Gentry	48

Ascot

Ascot—contemporary desk seating with softly contoured curvilinear lines. Scaled for office environments where space is at a premium.

Fully upholstered outer back is standard.

Seat height adjusts from 16"H to 21"H and is available with a manual or pneumatic adjustment mechanism.

Five-arm base is standard. Wood base caps are available.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

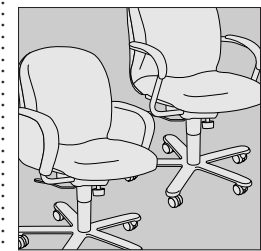

Backrest curves to provide proper support and prevent fatigue and strain.

Product Details

Low- and high-back desk chairs are available.

Arms on desk chairs can be enclosed or open.

Enclosed arms are fully upholstered to match the seat and back.

Open-arms are black metal and have upholstered arm caps that match the seat and back.

Five-arm base provides optimum balance. It is available with a maple wood base cap that is stained in the selected wood color.

Advanced swivel-tilt feature incorporates a no front-rise design that allows the seat to remain level even when the user leans back.

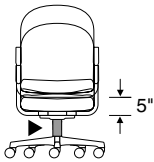

Actual Dimensions

Arm height from floor	22½"–27"	22½"–27"	22½"–27"	22½"–27"

Adjustability Features

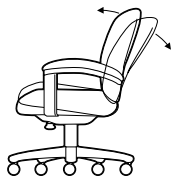

- Manual or pneumatic height
- Swivel-tilt control
- Knee-tilt control (optional)
- Upright back lock (on knee-tilt models only)
- Seat angle adjustment (on knee-tilt models only)
- Back tension control

Adjustment Features

Manual-height adjustment is standard on swivel-tilt base models. Rotating the unoccupied chair raises or lowers the seat. Occupant's weight disengages the adjustment mechanism, so height won't change while chair is in use.

Pneumatic-height adjustment, available on swivel-tilt base models, allows seat height adjustment from 16"H to 20½"H with fingertip pneumatic lever. To lower, hold handle up while seated. To raise, hold handle up and lift your weight off the chair.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Tip: Pneumatic-height adjustment is standard on knee-tilt models.

Seat angle control adjusts by shifting your weight to the back of the chair and flipping switch upward to engage. Disengage by shifting weight to the back of the chair and flipping switch downward.

Back tension varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Upright back lock. To lock back upright, push lever down while sitting upright. To release back lock, pull lever up while sitting upright.

Alcove

Alcove is a contemporary guest chair with upholstered seat and back.

Frame is European beech wood.

Back and seat are fully upholstered.

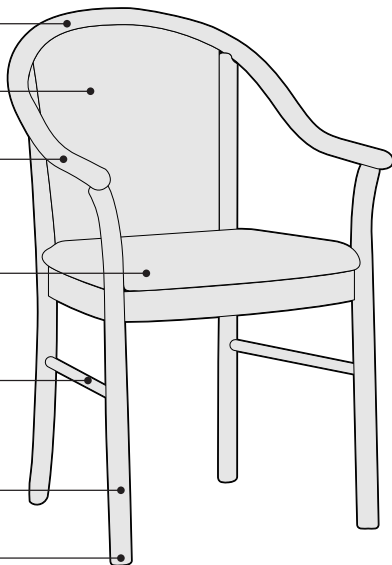

Arms are one-piece solid wood construction and form a gentle curve to provide comfortable seating.

Upholstered seat features a webbed panel construction.

Stretcher rails provide additional support.

Legs are solid wood.

Glides are 1/2" in diameter.

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Leather

Frame

- European Beech
- Tip: Wood finishes applied to beech will match the color of stains applied to oak, walnut, or cherry but will not have the same natural grain.*

Glides

- Stainless steel only

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the \$17 upcharge.)

- Canzoné
- Cavalcade
- Jacks
- Link
- Régis
- Roulette
- Spyder
- Sweepstakes

Soil-retardant treatment is available on all other seating fabrics at an additional \$17 U.S. per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Sales Service representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 142–145 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Collaboration

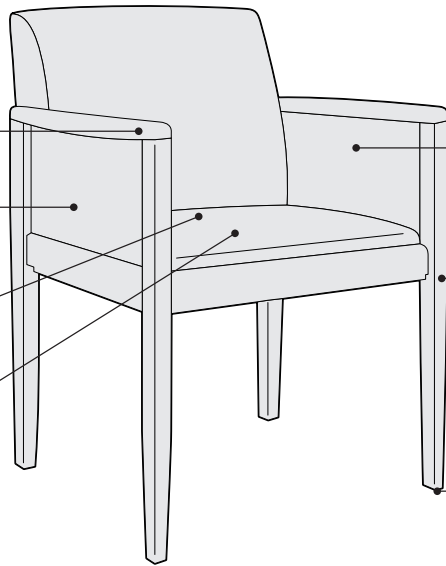

Collaboration guest chairs, designed by Dennie Pimental and John Duffy, have a classic design that is ideal for conference room, reception area, and dining room seating, or as guest seating in a workstation. A family of arm inserts are available to create a variety of different visual details.

Upholstered arm caps are available.

Maple inserts can match or contrast with frame color.

Back and seat are fully upholstered.

Upholstered seat features a webbed panel construction.

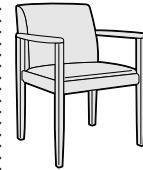

Arms may be enclosed with upholstery or hardwood inserts, or left open.

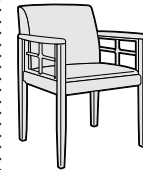

Frame is solid maple.

Glides are 1/2" diameter.

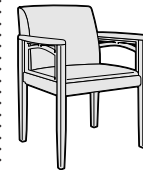

Product Details

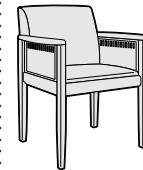

Open-arm chair is the simplest variation in the Collaboration family.

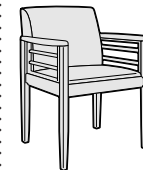

Mullion chair inserts divide the arm space with vertical and horizontal elements.

Arcade chair inserts introduce an arched motif.

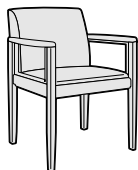

Eyelet chair inserts create rhythm with a slotted pattern.

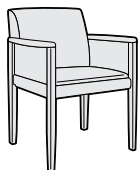

Ladder chair inserts establish a strong horizontal direction.

Actual Dimensions

Overall depth	24 1/4"
Overall width	22 1/2"

Escapade

Escapade contemporary guest chairs are available with upholstered or wood slat backs.

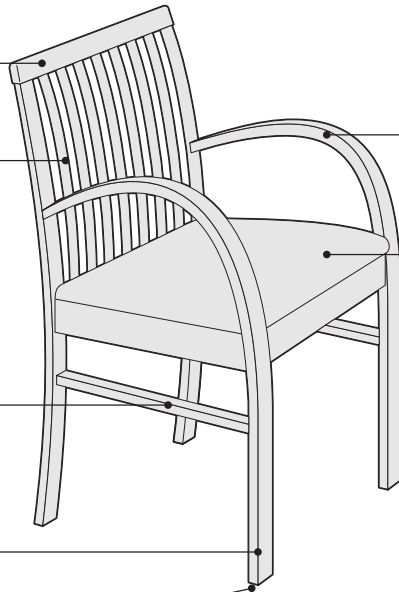

Frame is European beech wood.

Back is fully upholstered front and back or with vertical wood slats.

Stretcher rails provide additional support.

Legs are solid wood.

Glides are 1/2" in diameter.

Arms have an open arch that flows into the front legs.

Upholstered seat features a webbed panel construction.

Product Details

Two models are available—upholstered back or vertical-slat wood back.

Actual Dimensions

Overall depth	22"
Overall width	23 1/2"
Overall height	35"
Seat depth	17 1/2"
Seat width	21 1/2"
Back width	20 1/4"
Back height	16 3/4"
Width between arms	19"
Seat to floor height	18 1/4"
Arm height from floor	28 1/2"

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Leather

Frame

- European Beech
- Tip: Wood finishes applied to beech will match the color of stains applied to oak, walnut, or cherry but will not have the same natural grain.*

Glides

- Stainless steel only

All Steelcase seating with standard upholstery fabrics

complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

▶ See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the \$17 upcharge.)

- Canzoné
- Cavalcade
- Jacks
- Link
- Regis
- Roulette
- Spyder
- Sweepstakes

Soil-retardant treatment is available on all other seating fabrics at an additional \$17 U.S. per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Sales Service representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

▶ See pages 142–145 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Mingle

Mingle guest chairs, designed by Bill Schacht and Lynda Chesser, have a tailored appearance that is sophisticated and pure in design, yet simple in scale. Mingle's design addresses a broad set of applications from an open plan systems environment to a closed office setting.

Exposed plywood back panel provides enhanced lumbar support to achieve a high level of comfort.

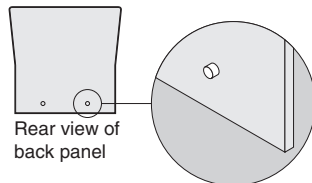

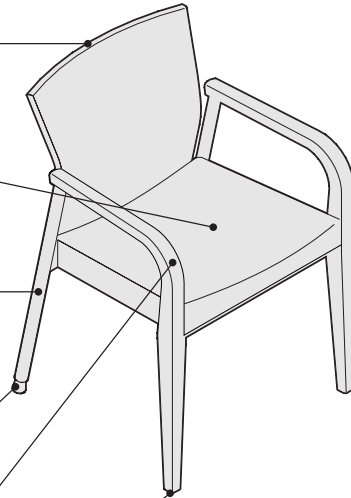

Seat is either upholstered or wood. Upholstered seat features a webbed-panel construction.

Back legs and seat frame are metal for additional strength and durability. Legs are standard in black. Nickel powdercoat is available as an option.

Foot cap is standard with nickel finish.

Arms taper to flow into front legs.

Glides are 1/2" diameter on front legs and 1" diameter on back legs.

Metal button fasteners located at bottom of back panel secure seat and back attachment while providing an additional element of design.

Actual Dimensions

Overall depth	22 1/8"
Overall width	22 1/4"
Overall height	32"
Seat depth	17 1/2"
Seat width	17 7/8"
Back width	17 1/4"
Back height	14"
Width between arms	19"
Seat to floor height	18 1/2"
Arm height from floor	25 1/2"

Surface Materials

Seat

Oriana

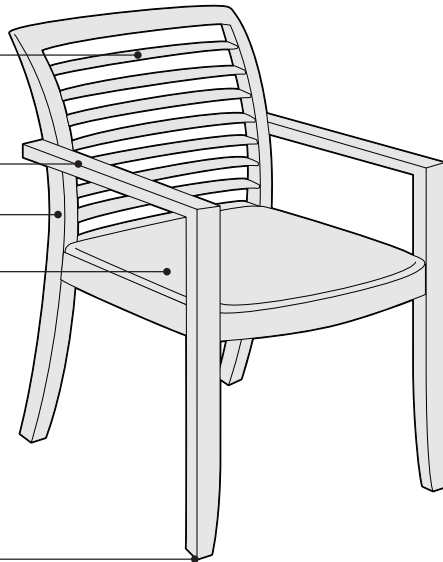

Oriana, designed by David Jenkins, is an interpretation of early ladder-back and slat-back seating designs. Its classic styling is suitable for both transitional and contemporary interiors.

Back is available in three design variations.

Arms are open.

Frame is maple.

Upholstered seat features a webbed panel construction.

Glides are 1/2" diameter.

Product Details

Back is available with horizontal slats, vertical slats, or closed upholstered construction.

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Leather

Frame

- Maple
- Tip: Wood finishes applied to maple will match the color of stains applied to oak, walnut, or cherry but will not show the same natural grain.*

- Customiz stain (option)

Glides

- Stainless steel only

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Standard, as well as State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the \$17 upcharge.)

- Canzoné
- Cavalcade
- Jacks
- Link
- Regis
- Roulette
- Spyder
- Sweepstakes

Soil-retardant treatment is available on all other seating fabrics at an additional \$17 U.S. per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Sales Service representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 142–145 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Terrazzo

Terrazzo guest chairs, designed by Brian Kane, have a classic and simple styling appropriate for a broad range of applications. A family of factory-installed back designs are available to create a variety of visual statements.

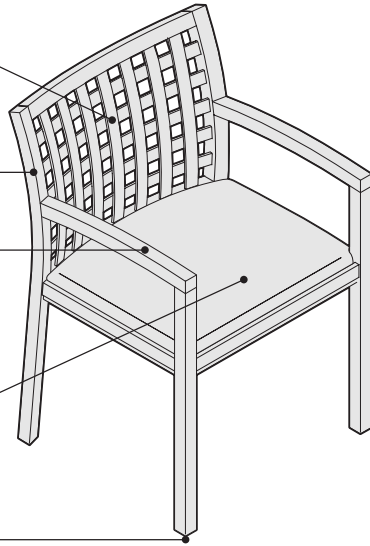

Lattice inserts are available in three designs. Slats are bowed to provide enhanced lumbar support.

Frame is solid maple.

Arms are arched to correspond with the curvature of the chair's back and are gently raised at the front to assist in entering and rising from the chair.

Seat is fully upholstered and features a webbed-panel construction.

Glides are 1/2" diameter.

Square lattice back chair

Macintosh lattice back chair

Horizontal lattice back chair

Actual Dimensions

Overall depth	21 ³ / ₄ "
Overall width	21 ¹ / ₄ "
Overall height	32 ¹ / ₄ "
Seat depth	17 ⁷ / ₈ "

Topaz

Topaz offers two chair styles to complement traditional and transitional office environments.

Frame is European Beech.

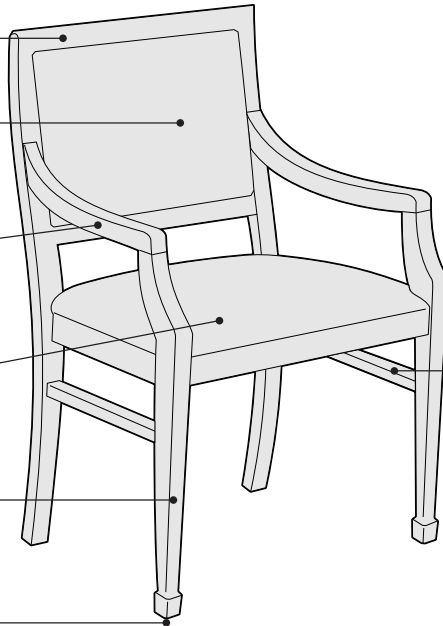

Back is upholstered and framed in wood. It is available either open or closed.

Arms are open. They are available with either a rectangular or curvilinear design.

Upholstered seat features a webbed panel construction.

Legs are solid wood. Front legs on open back model are carved for traditional detail.

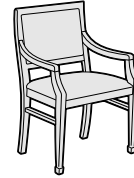

Glides are 1/2" in diameter.

Stretcher rails on open back model provide added support.

Product Details

Two models are available—open back or closed back.

Open-back models have rectangular arms, carved detail on the front legs, and stretcher rails.

Closed-back models have curvilinear arms that flow into the front legs.

- Customiz stain (option)

Ganging device

- Black plastic only

Glides

- Nickel-plated steel only

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Flammability Standard, as well as the State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the \$17 upcharge.)

- Canzoné
- Cavalcade
- Jacks
- Link
- Regis
- Roulette
- Spyder
- Sweepstakes

Soil-retardant treatment is available on all other seating fabrics at an additional \$17 U.S. per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Sales Service representative at 1.888.STEELCASE (1.888.783.3522).

Fire Codes

► See pages 142–145 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models.

The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

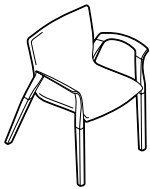

Local codes may have special requirements for upholstery.

Deck

Deck, stackable wood guest chairs designed by Brian Kane, combine function with a tailored aesthetic that is bound to become a modern classic.

Back and seat are available fully upholstered, with wood back and upholstered seat or with wood back and wood seat.

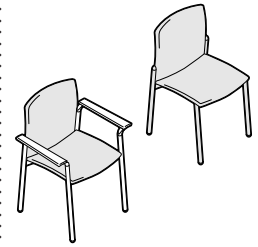

Arms are available as wood or black expanded urethane.

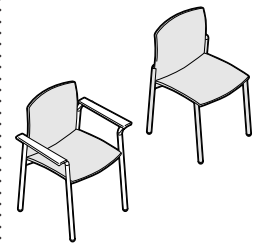

Legs are standard in black textured paint and available as an option in sterling paint.

Glides are 1/2" diameter.

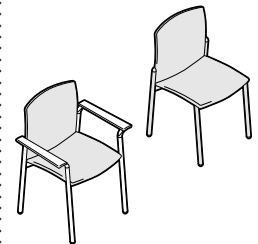

Product Details

Fully upholstered back and seat

Wood back and seat

Wood back and upholstered seat

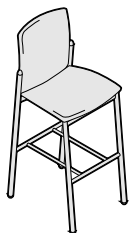

Deck stackable chairs with and without arms

are available in three styles—fully upholstered back and seat, wood back and seat, and wood back with upholstered seat.

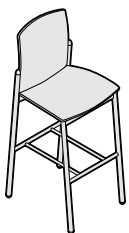

Chairs stack five high.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Étude

Étude lounge seating includes a club chair, love seat, and sofa in transitional styling. The wood base and curved legs compliment both transitional and contemporary environments.

Simple, curved transitional styling.

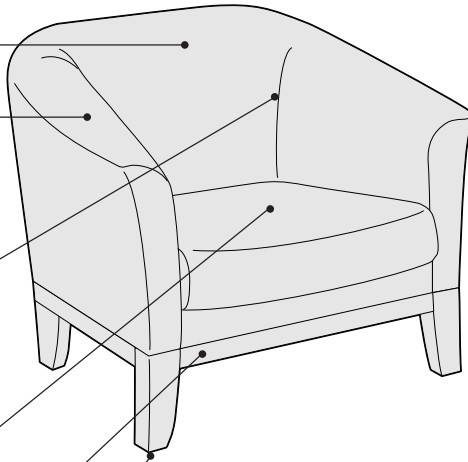

Arms follow a graceful curve.

Casual folds and gathers in back are designed to create a hand-crafted look.

Generous, comfortable proportions.

Base is maple.

Glides are 1/2" diameter.

Surface Materials

Upholstery

- Fabric
- Fabric with soil-retardant treatment (option)
- Vinyl
- Leather

Tip: Minor comfort wrinkles are inherent in the design of the seat and cushions.

Base and legs

- Maple
- Tip: Wood finishes applied to maple will match the color of stains applied to oak, walnut, or cherry but will not show the same natural grain.*
- Customiz stain (option)

Glides

- Stainless steel only

All Steelcase seating with standard upholstery fabrics complies with requirements of the BIFMA First Generation Voluntary Upholstered Furniture Standard, as well as State of California Technical Bulletins 116 and 117. All standard seating is labeled to be in compliance with California TB116/117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the \$17 upcharge.)

Groove

Groove modular lounge seating offers functional and aesthetic variety, access to power and data, and can reconfigure at a moment's notice.

Seat cushion is fully upholstered.

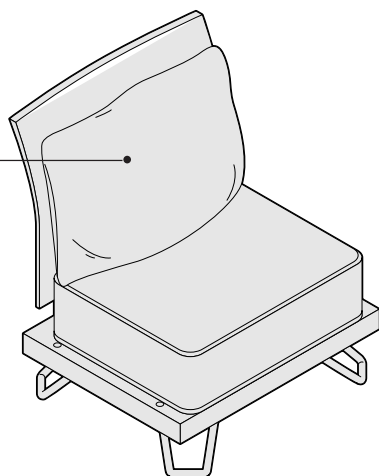

Legs or casters are available.

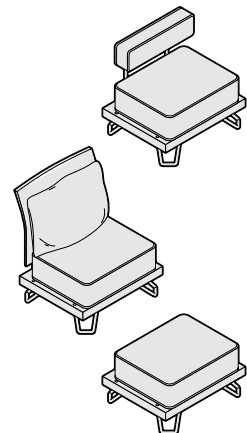

Upholstered block back

Wood base with or without grommets.

Plastic sail back with pillow.

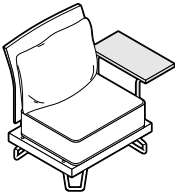

Product Details

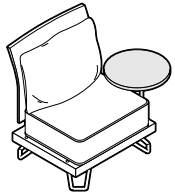

Groove lounge seating is available in two back styles—block back and sail back. Ottoman is also available. Chair and ottoman components are shipped separately and assembled in the field. Chairs can also be built up and reconfigured in the field. For build ups, order components separately.

Actual Dimensions

	Sail Back Chair	Block Back Chair	Ottoman
Overall depth	25 ¹ / ₄ "	25 ¹ / ₄ "	25 ¹ / ₄ "
Overall width	32 ¹ / ₄ "	32 ¹ / ₄ "	32 ¹ / ₄ "
Overall height	33 ¹ / ₄ "	28 ⁵ / ₈ "	15 ³ / ₄ "
Seat depth	18"	18 ¹ / ₄ "	23"
Seat width	28 ³ / ₄ "	28 ³ / ₄ "	28 ³ / ₄ "
Back width	30"	26"	N.A.
Back height from seat	17 ¹ / ₂ "	12 ⁷ / ₈ "	N.A.
Seat to floor height	15 ³ / ₄ "	15 ³ / ₄ "	15 ³ / ₄ "

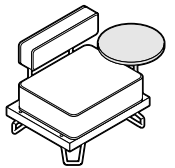

Sail back with tablet arm

Sail back with round arm

Block back with tablet arm

Block back with round arm

Round or tablet arm, ordered separately and field-installed, can be attached to left- or right-side of chairs.

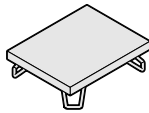

Table without grommets

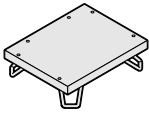

Table with grommets

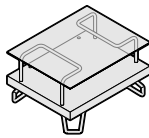

Table with acrylic top

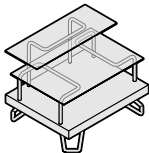

Table with acrylic top and shelf

Groove tables are available in a variety of configurations. Table components are shipped separately and assembled in the field. Tables can also be built up and reconfigured in the field. For build ups, order components separately.

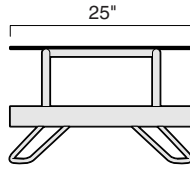

Table with acrylic top comes standard with larger acrylic piece.

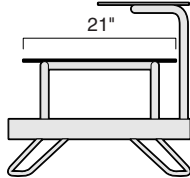

Table with acrylic top and shelf comes standard with smaller acrylic piece. Smaller acrylic top must be specified when ordering shelf kit. To create a buildup, you must order a smaller acrylic top with shelf kit.

Acrylic top sits on clear glides for tabletop applications. For shelf applications, acrylic is permanently affixed with clear screws.

Acrylic can be installed glossy side up or matte side up.

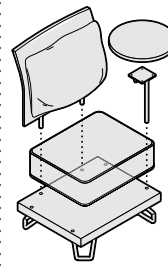

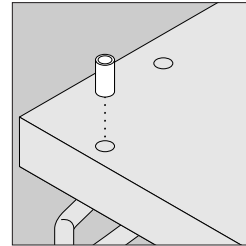

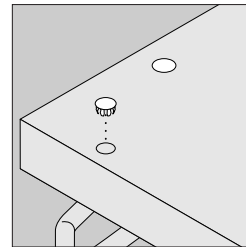

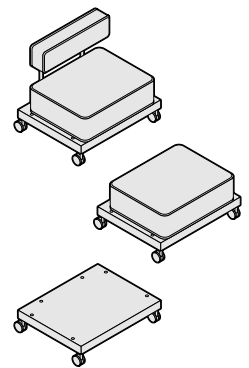

Table with grommets must be ordered to create buildups using table top, shelf, chair backs, and arm kits. *Tip: Grommets cannot be used to route cords or cables.*

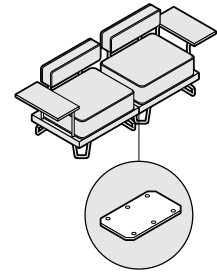

Grommet sleeves provide stability for components and must be in place to properly install components.

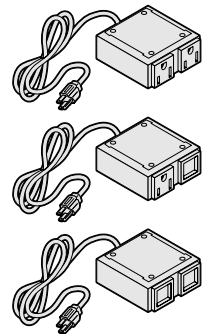

Caps, standard with table with grommets, are used to cover the grommet holes when not in use. Underside of table has storage place to hold caps when not in use.

Caster version of chairs, tables, and ottoman enable easy product configurations and mobility.

Ganging bracket is available to link chairs in the field for permanent connection.

Power/data boxes are available to provide additional electrical outlets and voice and data receptacles where needed. Power/power, power/data, and data/data versions are available. Boxes are field-installed and can be mounted to the underside of base anywhere access to power and data is needed.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials program
- “Available on” matrices
- Vertical surface fabric and seating upholstery selection listing
- Pricing for surface materials
- Technical data for surface materials
- Surface material care and cleaning instructions

Surface Materials

Finishes Binder includes:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces

Surface Materials

Vertical Surface Fabric Binder includes:

- A complete set of swatch cards for vertical surface fabric

Surface Materials

Seating Upholstery Binder includes:

- Designtex Graded-In Catalog
- A complete set of swatch cards for seating upholstery

Surface Materials

Tool Box provides 3" x 3" samples of the following surface materials:

- Vertical surface fabric
 - Seating upholstery
 - Wood veneer
 - Paint
 - Laminate
- Form number S8150

Metal

- 7026 Nickel
- 7098 Sterling
- 7207 Black
- 9201 Polished Chrome

Wood

- ▶ See *Wood Color Availability Matrix* on page 146 for color availability by product line and wood species.
- Tip: The wood used in the construction of chairs is either maple or European beech. Wood finishes applied to maple or beech will match the color of stains applied to oak, walnut, or cherry, but will not have the same natural grain. Exception: Groove is a wood-veneered product.*

Wood Seating color choices

- 3412 Natural Cherry
- 3422 Medium Cherry
- 3562 Linseed
- 3572 Amber
- 3582 Winter
- 3592 Blonde
- 3632 Medium Oak
- 3642 Natural Oak
- 3712 Natural Walnut
- 3722 Dark Mahogany on Walnut
- 3742 Autumn Walnut
- 3772 Medium Mahogany on Walnut
- 3792 Black Walnut

Customiz stain is a service that allows you to create your own stain color. Minimum order quantities, per unit up-charges, and a one-time customer processing fee apply.

- ▶ See the *Surface Materials Reference Manual* for more information.

Plastic

Available on:

- Snodgrass 474 Series chair frames

- 6205 Black
- 6250 Coffee
- 6256 Graphite

Upholstery

Tip: Some of the vinyl colors listed below were slated to be culled in October 1999; however, they will remain available to existing customers indefinitely. A project is in process to improve the Steelcase seating vinyl color offering.

Classics Collection

Surface materials in the Classics Collection are timeless. These materials should be available for a minimum of 10 years from the date the material is introduced into the Classics Collection. The Classics Collection includes the following fabrics in Price Groups 1 through 3 and the Leather Price Group:

Designtex Graded-In Program

All Designtex Graded-In fabrics are now supported just like standard fabrics when ordered on Steelcase furniture. The Designtex Graded-In Program also includes the Environmental Impact Collection which offers sustainable textiles in affordable price groups. For additional information and fabric samples, contact your local Designtex sales representative at 1.800.221.1540.

Designtex upholsteries are graded into Steelcase Price Groups 2 through 10:

Price Group COM/COL (Customer's Own Material/Leather)**Fabric Approval and Yardage**

To confirm whether a particular COM material has already been tested for use on a specific Steelcase product or to determine actual yardage requirements:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

You can find the same information on the in2 site.

Follow these steps:

- Visit www.in2.steelcase.com
- Click on "Sales/Design Team"
- Select "Surface Materials"
- Select "Customer's Own Material"

For additional information regarding Customer's Own Material, call 1.888.STEELCASE.

Wood Seating Upholstery Matrix

Not every fabric is available on every chair. This matrix gives an overview of the upholstery fabrics that can be specified on each seating product line.

Fire Code Wood Seating Upholstery Matrix

Wood Seating Upholstery: Availability of Fire Code Treatment

Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas.

The following matrix lists each seating line and denotes fabrics that are available, available with exceptions, and not available.

	1	2	2	2	3	1	Leather	1	2	2	1	2	2	3

Surface Materials

Fire Code Seating (FCS) Exceptions for Wood Seating

The Fire Code Seating (FCS) modification is available on nearly all Wood seating. There are some chair and fabric combinations that will not pass the test criteria for Fire Code Seating. This is often due to the chair configuration, large surface areas that support combustion, and the fiber content of some fabrics. For your convenience, we have listed the chair line exception models and the fabric combinations that **are available**. If a fabric is not listed, it is not available with the FCS option on the exception chair models.

Ascot

Ascot enclosed-arm models 296 and 276 and all variations of these models **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Breton is not available with the FCS modification.

Collegium

Collegium enclosed-arm models 411 and 421 and all variations of these models **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Decorum

Decorum enclosed-arm models 211 and 221 and all variations of these models **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

England

England enclosed-arm model 0113 **is available** with FCS in the following fabrics only:

- Leather
- Seating Vinyl

Étude

Étude club chair 0811 **is available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Gentry

Gentry enclosed-arm models 0644W, 0634W, 0644B, 0634B, and all variations of these models **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Mansfield

Mansfield high-back model 140 and all variations of this model **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Masque is not available with the FCS modification.

Snodgrass

Snodgrass enclosed-arm model 474427W and all variations of this model **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

The Fire Code Seating option is available on certain chairs with COM. Fire code approval is based on chair model and specific textile combinations.

To find out if a specific COM is FCS approved on a Steelcase seating product, check the COM Web site at www.Steelcase.com:

- Click on “Knowledge & Design”
- Click on “Customer’s Own Material”
- Click on “Fabric test results”

In this matrix, there is a “FC” (fire code) line for each fabric, with a code word that describes the fabric’s availability on each chair line:

- “All” means that the fabric in question is available as FCS on all models of the chair line.
- “Restricted” means that the fabric is available as FCS on some models of the chair line.
- “Unknown” means that the fabric has to be qualified as FCS on that chair line.
- “None” means that the fabric is not available as FCS on that chair line.

Due to the many different combinations of fabric contents and changes that could be made by Steelcase to seating models, fabrics that have been previously approved for fire code may need to be re-tested for qualification.

For complete information about specifying COM on FCS modified chairs, call your Steelcase COM consultant at 616.475.2426 or fax inquiries to: 616.698.4700. Please provide the following information about your COM when making an inquiry:

- Supplier and fabric name
- Flammability testing
- Topical treatments
- Fabric weight
- Fiber content of the fabric
- Seating model number intended for application

The price for the FCS modification with COM is \$50 U.S. on all non-wood seating units and \$80 U.S. on all wood seating units. Please add the price to Price Group COM column within each Steelcase price list.

FCS Testing

Please submit a COM Application Testing Request form for FCS evaluation prior to sending any fabric. A COM consultant will contact you with more information.

Yardage requirements will vary per chair test. If your material requires FCS testing, submit a completed COM application Testing Request form and material to: Steelcase Inc.
Attn: COM Testing
Door 305
4060 Eastern Avenue
Grand Rapids, MI 49508

\$700 net testing fee is required for a full scale chair burn test. FCS testing lead time is 3-4 weeks.

Flame Retardance of COM Fabrics

Steelcase assumes no liability for COM fabrics with a flame-retardant finish and recommends that samples of the fabrics in question be submitted to the proper authority for certification.

If a flame-retardant finish is required, please advise your Steelcase Sales Services representative or regional office of the following information:

- Flammability code that must be passed
- Application of the fabric to be finished (i.e., upholstery, wall, panel, etc.)
- Weight of the fabric
- Need to apply other chemicals to the fabric (i.e., soil repellents)
- Type of backing
- Yardage requirements

With this information, Steelcase can contact the appropriate outside finisher and generate a quote. Treatment prices vary with quantity and fabric selection.

Wood Color Availability Matrix

Not every wood color is available on every seating component. This matrix gives an overview of which wood colors can be specified for each seating component.

Species or type of wood			3412 Natural Cherry	3422 Medium Cherry	3562 Linseed	3572 Amber	3582 Winter	3592 Blonde	3632 Medium Oak	3642 Natural Oak	3712 Natural Walnut	3722 Dark Mahogany on Walnut	3742 Autumn Walnut	3772 Med Mahogany on Walnut	3792 Black Walnut
Alcove	Frame	European Beech	■	■	■	■	■	■	■	■	■	■	■	■	■
Alerion	Frame	Maple	■	■	■	■	■	■	■	■	■	■	■	■	■

- ▶ See specification pages for details.

What is the issue?

Some textiles are plain and look the same regardless of which direction the fabric is applied to the product. But many customers prefer fabrics that have patterns that give a clear direction to the textile. Because there are limits to how directional fabrics can be applied to panels and chairs, it is important to understand directional fabrics to avoid being disappointed.

Talking about direction

Fabrics come on rolls. The long threads that run parallel to the length of the roll are called the warp. The perpendicular threads that run parallel to the width of the roll are called the filling.

Railroaded means the height dimension of the product is perpendicular to the warp of the fabric; *warp horizontal* and *across roll* are other terms for running the fabric in this direction. All Steelcase standard fabrics are railroaded. The yardage requirements for railroaded cutting are calculated using the width of the fabric, quantity ordered, style of chair(s), and pattern repeat.

Woven way means the height dimension of the product is parallel to the warp of the fabric; *warp vertical* and *down roll* are other terms for running the fabric in this direction. The yardage requirements for woven way cutting are calculated using the width of the fabric, quantity ordered, and style of chair(s).

What determines fabric direction?

The width of the roll of fabric and the techniques that are used to apply it to the product can both determine the direction. Standard default direction for seating products with Steelcase standard fabrics is railroaded. No exceptions are possible. COM fabrics are standard woven way. You may specify a COM fabric to be cut in a specific direction if the product allows it to be applied. The purchase order must clearly state the cutting direction if it is other than standard.

Tip: If you are changing the cutting direction of fabric, yardage requirements may increase, resulting in an additional upcharge. This upcharge will be applied to the purchase order.

► See *Yardage Requirements* in the *Surface Materials Reference Manual* for specific information.

If you have any questions regarding cutting direction guidelines, please contact a Steelcase COM consultant at 616.246.9822 or 1-888-STEELCASE. You can also find this information on our Web site:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

COM pattern exceptions

Sometimes COM fabrics have patterns that look awkward or inappropriate if they are applied in the standard direction (woven way). Those cases are addressed with these two pattern exception rules.

Incorrect

Correct

Incorrect

Correct

1

Fabrics with stripes or flame stitch will be applied so that the patterns are vertical.

Incorrect

Correct

Incorrect

Correct

2

Fabrics with patterns of people, vines, or flower arrangements will be applied so that the pattern is vertical.
