4

## **Coverage, Contacts and Call to action**

*Learn positioning and selling EverFlex offerings.*

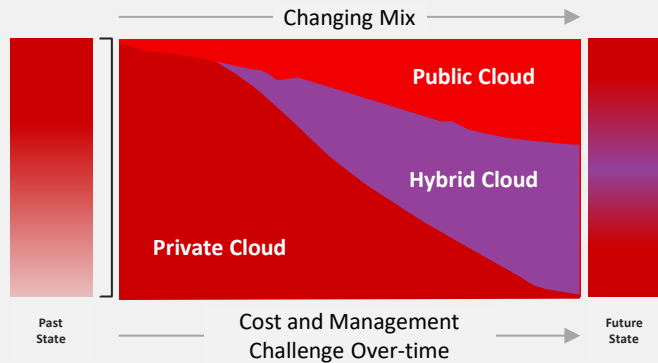

# IT Purchasing Models are Changing.....

By 2028, 65% of Tech buyers will prioritise as a service consumption for infrastructure purchases to control spend, automate & fill skills gaps

Source : IDC FutureScape

## “Infrastructure Customers want more from their Suppliers”

Simplify and unify the way we manage and secure

Take more administrative and operational responsibility

Plan to use flexible, pay-as-you go OPEX consumption

## “Need to Balance public and private cloud strategy, aligning to a common Hybrid Cloud Operating Model”

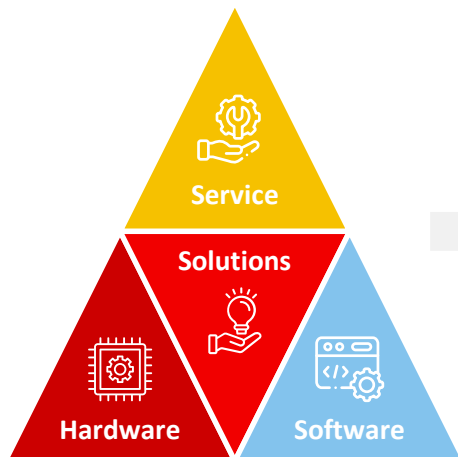

# Introduction to Hitachi EverFlex

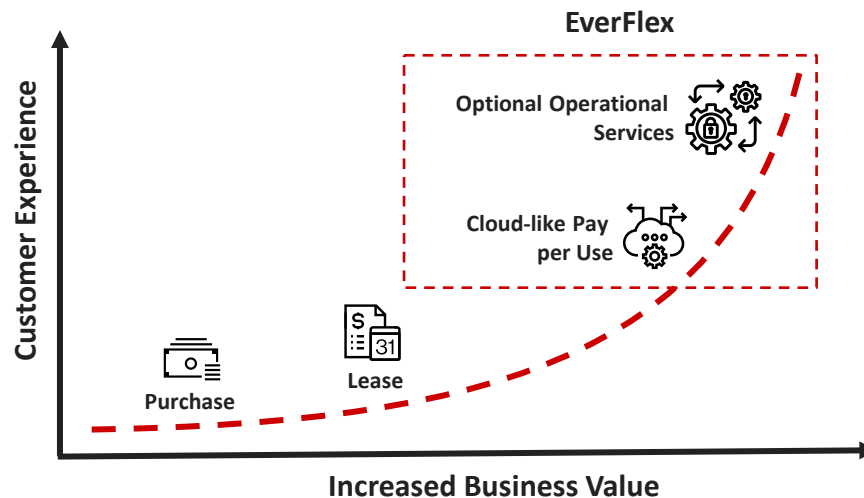

Flexible capacity and pay per use elastic consumption, delivered and managed your way.

## Your Choice of Offerings

Different ways to procure

All the benefits of cloud economics with the security of on-premises

# Simple Service Classes

*Service classes are the units of consumption that are measured to calculate the monthly fees.*

**vCPU**

For general purpose VM's, these are typically 1 x physical core to 4 x vCPU

**RAM**

RAM for VM's is always delivered as 1GB to 1GB and consumed by VM's

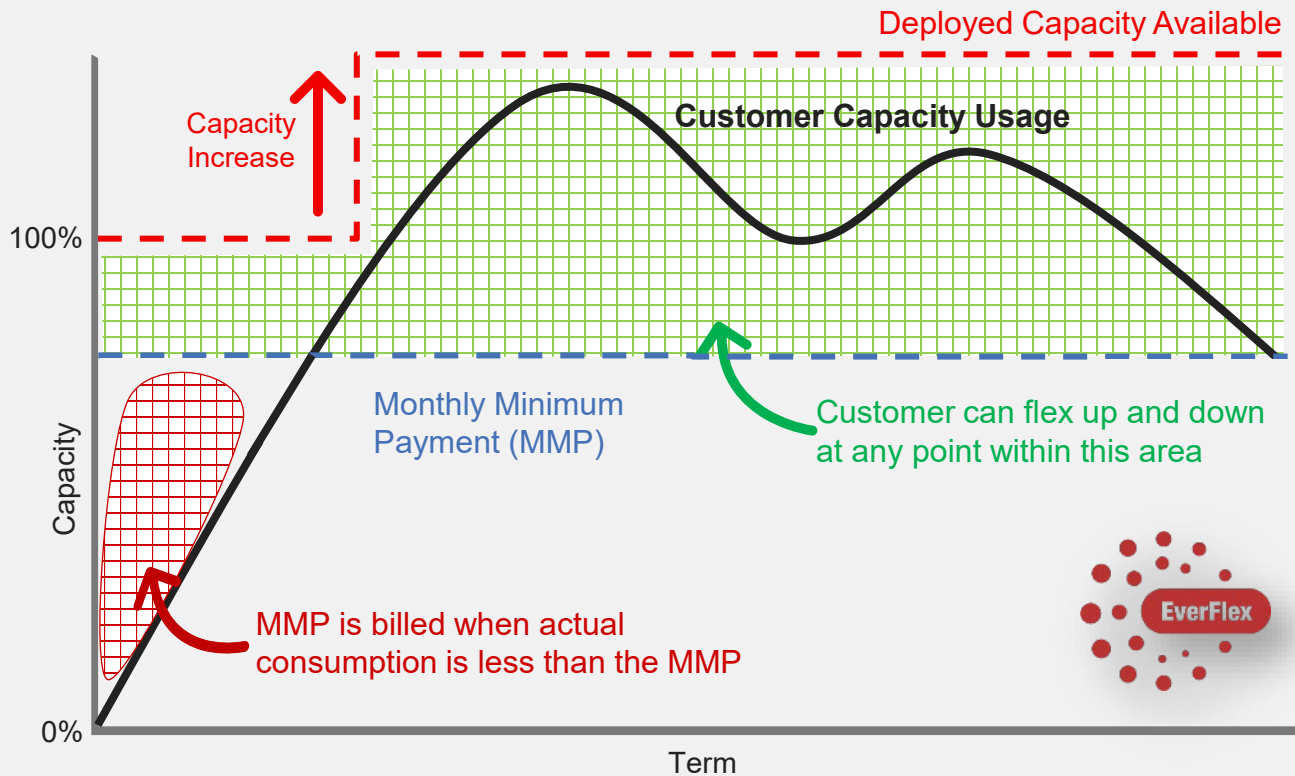

**Storage**

Storage is typically billed per GB of customer data

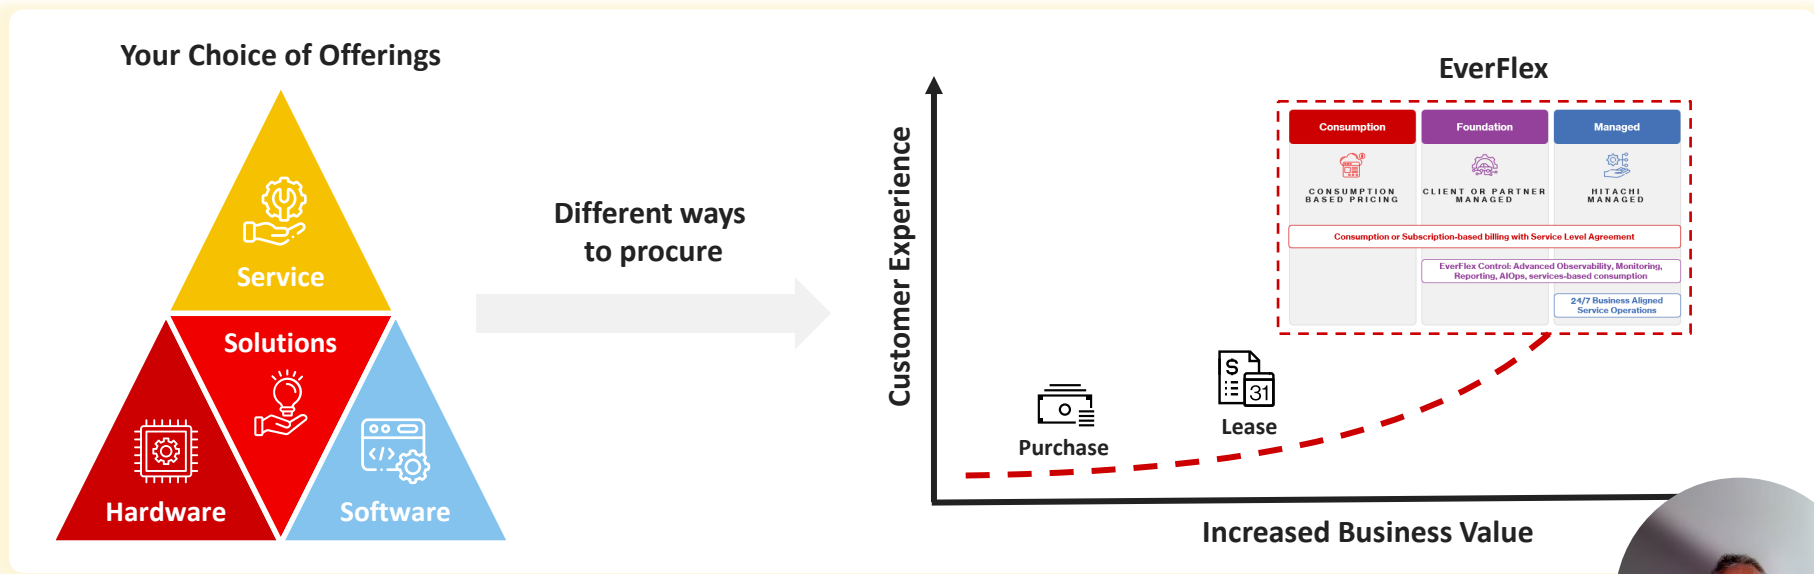

# Hitachi EverFlex Consumption Explained

# Standardized EverFlex Infrastructure as a Service portfolio

Flexible capacity and pay per use elastic consumption, delivered and managed your way.

→ All the benefits of cloud economics with the security of on-premises

# Hitachi EverFlex Infrastructure as a Service

Levels of Service: Consumption, Foundation and Managed

**Business Value and TCO Savings**

**HITACHI MANAGED**

**Consumption or Subscription-based billing with Service Level Agreement**

**EverFlex Control: Advanced Observability, Monitoring, Reporting, AIOps, services-based consumption**

**24/7 Business Aligned Service Operations**

**Professional Services & Technology**

# EverFlex with Partners | IaaS Engagement Strategy

EverFlex

Choice of IaaS Offerings

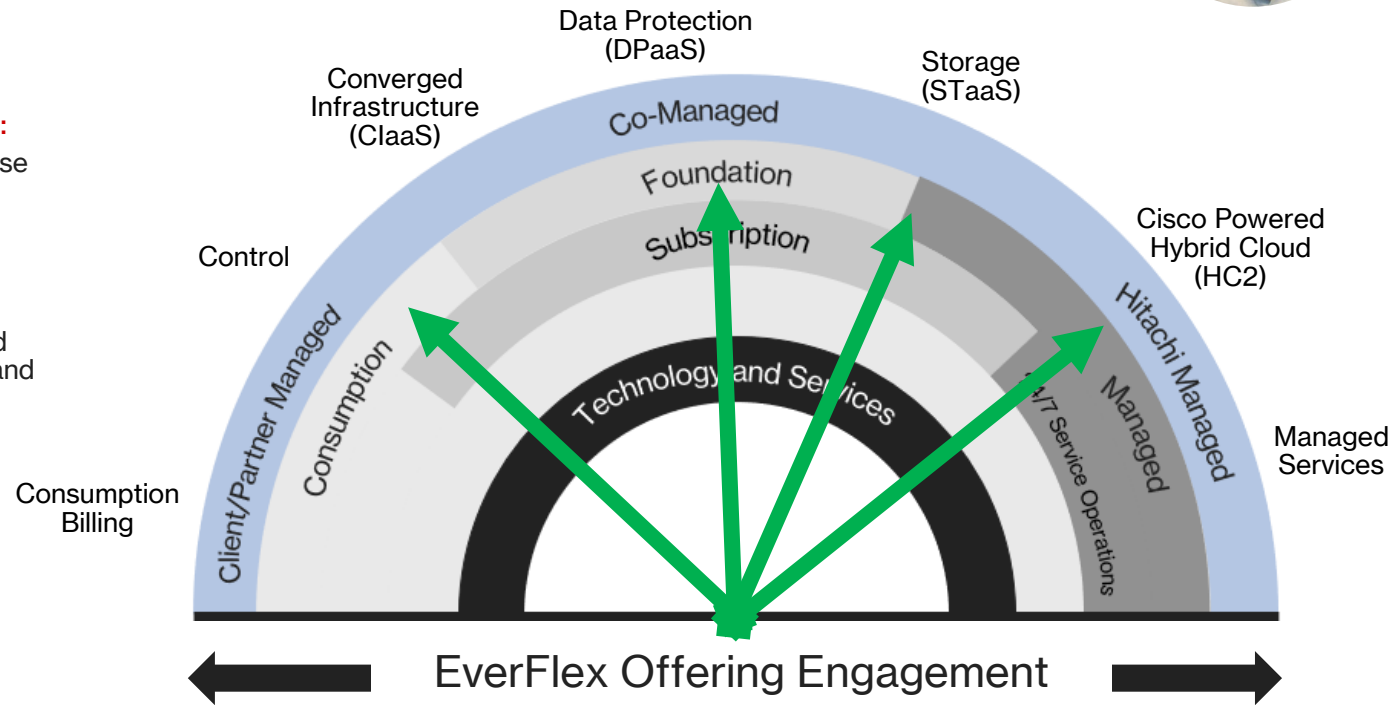

– Ever Flexible

## Choice of partner engagement:

- Partner Managed starting from base **Consumption Services**
- Hitachi Vantara Managed with specialized **Managed Services**
- Co-Managed between Partner and Hitachi Vantara with **Foundation** and **Subscription Services**

## Choice of delivery model regardless of partner agreement:

- Resell
- Deliver
- Manage

# Optional Foundation Level Professional Services

## Foundation

In addition to leveraging our extensive range of professional services for design, implementation, optimization, and migration, we would like to highlight two key services to maximize your EverFlex offering:

- 1. EverFlex Control Advanced Enablement:** This comprehensive transformation program evaluates your heterogenous environment and seamlessly integrates EverFlex Control to optimize your operations. Our expertise ensures a smooth knowledge transfer to your team.
- 2. Operational Residence Services:** Hitachi Global Services tackles talent shortages and skill gaps by providing technology experts, either on-site or remotely, to enhance your IT staff and support the day-to-day operations of the EverFlex offering.

# Hitachi EverFlex Managed Services

## Managed

Whether you prefer hands-on with Consumption and Foundation, or hands-free, EverFlex has you covered. For hands-free, simply leverage our managed services:

1. Instead of maintaining a full-time staff and keeping them updated on skills and technology, you can opt for a managed service agreement with Hitachi. This shifts your business to cloud-like, consumption-based pricing that includes day-to-day operations, administration, and management of your IT infrastructure for data center investments.
2. Hitachi takes responsibility for IT services and equipment, backed by contractual SLAs and pay-per-use pricing. With handpicked experts, EverFlex Control using AI-driven management tools, industry best practices, and economies of scale from a large enterprise like **Hitachi to deliver the best outcomes with consistent SLAs.**

# New Hitachi EverFlex | Infrastructure as a Service Portfolio

EverFlex is a portfolio of as-a-service and consumption-based offers for workload transformation and hybrid cloud operations
